MEETING OF THE MINDS · MONTEREY, CA

From Curiosity to Capacity

How one workforce board built a practical, responsible approach to AI

Kyle Hamilton · Ryan McAlister

Fresno Regional Workforce Development Board

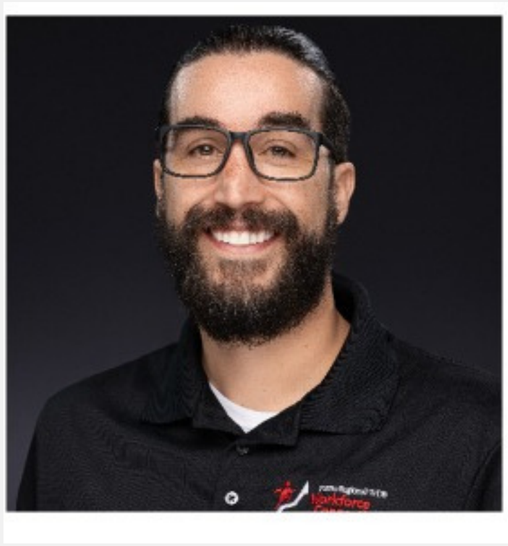
Your Presenters

Fresno Regional Workforce Development Board

Kyle Hamilton

Research Analyst & ETPL Coordinator

Leads research, grant development, policy analysis, and oversight of the Eligible Training Provider List.



Ryan McAlister

Senior Training Coordinator

Leads staff and job seeker training, including workshops and skill-building programs.

GROUP ACTIVITY

Before we talk about workforce development in the age of AI, we want to build something with you.

In the next few minutes, everyone in this room is going to help create an original song for Meeting of the Minds.

AI can generate the music, but it needs human ideas, experiences, and direction. You are the minds in this meeting.

Collect the ingredients

1

"What is a word the workforce of the future needs?"

2

"What is a challenge our communities must overcome?"

3

"What is the thing humans will always bring that technology cannot replace?"

4

"What should our anthem sound like?"

What just happened here?
Did AI create this or did we?

That is the question at the center of today's session.
AI didn't replace the room. It amplified the room.

- That song did not exist a few minutes ago.
- It came from the collective intelligence in this room.
- Guided by people and accelerated by technology.

Welcome to Workforce Development in the Age of AI.

Fresno Regional Workforce Development Board

Empowering Fresno: Our Services and Communities

150 +

employees across the organization including providers

AJCC

a proud partner of America's Job Center of California

WIOA

discretionary grant-funded programs

WHAT WE DO

- Run four career centers across Fresno County
- Fund and oversee occupational training
- Connect local employers to the talent they need
- Administer WIOA and discretionary grants while ensuring compliance

WHO WE SERVE

- Job seekers across Fresno County
- People working around real barriers to work
- Youth, adults, and dislocated workers under WIOA
- Employers looking

Every service we fund reaches the public through a person at a desk. That's where our journey in AI started.

Bridging the Gap: From AI Interest to Organizational Readiness

01

PREPARE YOUR PEOPLE

How do you build AI confidence and capability across an organization where everyone starts at a different level?

02

CREATE SAFE BOUNDARIES

How do you encourage staff to use AI while protecting participant information, maintaining compliance, and keeping humans accountable?

03

MAKE IT USEFUL

How do you move beyond experimentation and make AI practical enough to improve everyday work?

Our goal wasn't simply to introduce AI. It was to build an organization that knew how to use it ethically, where to best use it, and when not to use it.

Our Board Has a Range of Users, Not a Room of Experts

Our employees use AI with very different starting points. That diversity is expected. What matters is that everyone operates from one shared, safe approach.

Daily power users

Regular users

Staff just getting started

Our AI Journey: What We’ll Cover Today

01 **Where this started**

Staff were using AI before we had rules. What we did about it.

02 **The four moves we made**

Everyone in one room → train the supervisors → writing the rules → turn rules into training.

03 **The rules themselves**

What's allowed, what's forbidden, and who stays accountable.

04 **What we learned**

The seven things that mattered most and where we go from here.

01

Curiosity

The Reality of Early AI Experimentation

IN THIS SECTION

01 It started without us

02 The upside and the risk

03 Why we trained people

The Reality of Bottom-Up AI Adoption

Staff were already using AI on their own using free or personal premium accounts.

- Staff were experimenting before we had established a policy
- The early wins were boring and great: Drafting, summarizing, research
- But everyone worked differently. No shared rules. No approved list
- We tried the big ones together: ChatGPT, Copilot, Gemini, Canva
- ChatGPT became the default; Copilot and Gemini stayed close behind

THE LESSON

The choice isn’t whether staff will explore AI. It’s whether we give them the guidance to explore it safely and responsibly.

THE STAKES

Two Things Are True at Once

We built to capture one side without pretending the other doesn't exist.

THE UPSIDE OF STAFF USING AI

- Less time drafting, documenting, formatting and more time listening and coaching with Job Seekers
- Turning ideas into quality drafts worth editing, with less templated language
- Better training and instructional content
- Give staff more time for the work only humans can do

THE RISK

- Participant PII walking into an outside tool
- Answers that are confident, convincing, but wrong
- Bias against the exact people we're here to serve
- Compliance exposure on anything with our name on it

The question stopped being “should we use AI?” and became “how do we use it well?”

OUR ONE BIG BET

People Before Technology

Most places fund the technology and assume the people part sorts itself out. That's why AI projects stall.

THE TECH TRACK

What everyone budgets for

- Purchasing licenses
- Security and data protection
- Integration with the systems you already run
- Governance and migration

THE PEOPLE TRACK

What we did first

- Coursework, in a fixed order
- Hands-on practice with real work tasks
- Constant, plain-language communication
- Investing time dedicated on the calandar

Four moves got us from curiosity to capacity. None of them required a budget line.

02

Second Step: HOW WE DID IT

The Four Moves

Every one of them ran on staff time. None of them needed a budget approval.

MOVE 1

All Staff Conference: Getting Everyone in the Room

One full day. No rotating cohorts. If half your staff hears it in March and half in September, you end up with two cultures.

1 full day, everyone

6 industry sectors on the panel

40 structured staff reflections

Employers told our staff what AI was doing to hiring. Far more credible than us saying it.

Collective Intelligence Session:
Ai Across Sectors: Shaping the Future of Work
Moderator: Blake Konczal, FRWDB Executive Director
Education/Technology: Dr. Keith Clement (CSU Fresno)
Healthcare Sector: Casey Gray, MD (Kaiser Permanente)
Manufacturing: Stephen Avila (Trillium Flow Technologies)
AG/Education: Dr. Linda Thomas (Fresno Pacific University)
Agriculture: Jose Cobos (Valley Institute for Sustainability, Technology & Agriculture | UC
Workforce Deve ment: L. Bradl Williams (Equus Workforce utions)

MOVE 1, THE AGENDA

The Full-Day Blueprint

One day, ten blocks, built around our own regional economy.

7:30	Check-in, breakfast, networking
8:30	Icebreaker and welcome — why a workforce board needs to discuss AI
9:00	Plain-language keynote: what the technology actually is
10:15	Six-sector employer and educator panel, moderated
11:15	Small-group discussion and report-out ← reflection round 1
12:00	Lunch and Live AI Demonstration
12:45	AI in action: soft skills and job readiness
1:45	The non-AI future: high-demand, human-centered jobs
2:45	Facilitated application discussion ← reflection round 2
3:15	Close and next steps

Five Questions That Built Our Roadmap

The first two questions open people up; the last one turns their insights into a recommendation.

01 What was the most important or interesting thing you learned today?

02 What challenges might we face using this information at work?

03 What are you most excited to bring back to your team?

04 How will you use what you learned to better support participants?

05 Name one step this organization can take to better prepare participants.

Five Questions That Built Our Roadmap

Coded from 40 written reflections from our staff.

01 **Translation and participant communication**

02 **Résumés, cover letters, interview prep**

03 **Repetitive documentation**

04 **Customized job readiness workshops**

05 **Career exploration in changing occupations**

Turning Concerns Into Policy Outlines

We wrote all of it down. Every one of these became a line in the policy.

DATA AND SECURITY

Participant PII in a prompt. Cybersecurity. Whether these tools even talk to our systems.

ACCURACY AND BIAS

Output that reads generic. Misread participant responses. No agreed standard for human review.

BARRIERS TO ACCESS

Rural connectivity, access to devices, digital literacy skills, and paid licenses.

TRUST AND SKILL

Job seekers pushing back on being assessed by a machine. Overreliance eroding writing and judgment. Empathy lost to automation.

Concerns are not resistance. They're your policy outline, written by the people who have to work and live with the consequences.

STAFF REFLECTIONS

“There will always be a human component.”

“Get comfortable being uncomfortable. That is growth.”

“AI enhances the job; it does not replace it.”

Leadership-Focused AI Training

The conference created questions and showed that we needed to prepare leadership to support staff.

WHO	Every manager and director across the board, in the months right after the conference
WHAT	Three structured courses, in a fixed order.
HOW	Graded, hands-on exercises through DataCamp Donates.
THEN	Hands-on ChatGPT practice

MOVE 2, IN DETAIL

Concepts → Then the Tool → Then the Skill

Three courses in a fixed order. The order is the whole point.

01

Understanding Artificial Intelligence

What the technology actually is, and where it breaks, before anyone opened a tool.

02

Understanding ChatGPT

The specific tool we chose to license: how it behaves, what it keeps, and where it is confidently wrong.

03

Intro to Prompt Engineering

The part that turns awareness into a usable skill by structuring a request and fixing a weak answer.

Most organizations start at number three. That's why their staff write bad prompts and trust bad answers.

MOVE 2, THE PART NOBODY BUDGETS FOR

One Standing Hour Every Week for Four Weeks

Coursework gave staff vocabulary. A weekly hour together turned into a team preparing for the future.

Two questions, every single week: What did we learn? And how does it apply to a workforce board?

It kept things alive

Managers brought what they'd actually tried that week, a prompt that saved an hour, a summary that came back wrong.

The concerns had names

Staff had already named privacy, accuracy, and equity on their reflection sheets. The weekly hour is where supervisors worked out what to do about them.

Started building a blueprint

The boundaries that became our policy bulletin were argued out over sandwiches long before anything reached formal review.

Cost: one recurring hour and some sandwiches. No budget line, and the highest return of anything we did.

03

Third Step: CAPTURE THE UPSIDE, CONTAIN THE RISK

Writing the Guardrails

Policy Bulletin · In effect since March 2026 · Binding on staff, providers, and contractors

IN THIS SECTION

01 How we wrote it in four months

02 Green light, red light

03 The four guardrails

MOVE 3

We Wrote the Rules

Four months from that all-staff day to a binding policy bulletin. Here's the shortcut.

12 Policies

POLICIES READ SIDE BY SIDE

Other workforce boards, public agencies, community colleges, nonprofits, private employers. Reading them together showed which rules everyone lands on.

PANEL

OUR OWN CONFERENCE SPEAKERS

The employers and educators from our panel shared their internal guidance and reviewed our draft, including what they'd write differently a second time.

PEERS

PROFESSIONAL NETWORKS

Peer boards, state association contacts, colleagues at other agencies. Nearly everyone we asked said yes and sent documents.

Adapt, don't adopt.

A tech firm's policy assumes engineers. A college's assumes faculty. Ours had to assume a case manager holding a WIOA file.

THE POLICY, IN ONE SLIDE

Green Light, Red Light

✓ GREEN LIGHT

- Drafting emails, reports, and communications
- Research, brainstorming, summarizing public info
- Résumé and interview support (with PII removed)
- Spreadsheet formulas, documentation, workflow help
- Improving clarity, quality, and efficiency

✕ RED LIGHT

- Entering participant PII or credentials
- Deciding anyone's eligibility for services
- Writing official case notes or case management docs
- Replacing human judgment in compliance, HR, safety
- Passing off unreviewed output as your own

Three hard lines, in plain English: No PII. No AI written case notes. No eligibility decisions.

FOUR RULES EVERYONE FOLLOWS

The Guardrails That Make It Safe

1 Protect the data

No names, SSNs, dates of birth, addresses, or phone numbers ever go into an AI tool. Anonymize every example.

2 Verify the work

Staff confirm facts, figures, sources, dates, and regulations against reliable sources before anything gets used.

3 Own the outcome

Staff remain fully accountable for the final product, even when AI helped produce it. Disclose significant use.

4 Approved tools only

Use what's on the vetted reference guide. A new tool gets reviewed and authorized before it gets used.

Backed by required training, a signed acknowledgment in every personnel file, monitoring, and annual review.

04

MOVE 4

From Policy to Practice

IN THIS SECTION

01 The staff training we built

02 Who owns what, task by task

03 The workflow we teach

04 The tools staff built themselves

MOVE 4 · REAL-WORLD AI

We Turned the Rules Into a Training

A hands-on staff course: AI in Case Management. Built in-house, no vendor.

BY THE END, STAFF CAN:

- Explain what AI can and can't be used for under our policy
- Apply a safe, ethical workflow to day-to-day tasks
- Recognize when output needs correcting, checking, or throwing out
- Use AI to sharpen not replace professional judgment

“AI is a support tool, not a replacement for the professional judgment that makes our work meaningful and effective.”

The line we want staff repeating back to us

Built in-house, piloted, and ready to scale.

The Line Between Support and Judgment

TASK	AI SUPPORTS	STAFF STILL OWNS
Career planning	Generates pathway ideas, action steps, goal language	Reviews for fit; finalizes the plan with the participant
Document Prepping	Organizes discussion points into a topic outline	Writes ALL official docs independently
Résumé development	Suggests transferable skills, bullet ideas and formatting	Tailors to the real background; verifies every claim
Mock interviews	Generates questions and evaluation criteria	Assesses the participant's actual performance
Barrier support	Offers general strategies for common barriers	Applies judgment; adapts to the real situation

If it touches eligibility, an official record, or a judgment about a person, a human does it.

WHAT WE TEACH EVERYBODY

Generate → Edit → Personalize

Three steps. Every staff member, every role, every time.

1 Generate

Ask AI for ideas or a rough first draft. Speed, not quality.

2 Edit

Cut anything generic, wrong, or off. Most people stop too early here.

3 Personalize

Add the real detail, your voice, and the context only you have.

If it sounds like a robot wrote it… a robot wrote it. Fix it before it leaves your desk.

THE PROMPT MOST PEOPLE WRITE

A Generic Prompt Gets a Generic Agenda

Example: Designing a 60-minute agenda on interview skills for Job Seekers

THE PROMPT

AS MOST OF US WOULD TYPE IT

“I'm a workforce coordinator. Draft a first version of a 60-minute workshop agenda on interview skills for adult job seekers.”

Twenty words. The model decided the rest.

WHAT CAME BACK

THE AGENDA IT PRODUCED

- Welcome and introductions — 5 min
- Why interviews matter — 10 min
- Common questions to expect — 15 min
- Practice activity — 20 min
- Questions and wrap-up — 10 min

Correct, and reusable by anyone, anywhere.

It knows the topic. It doesn't know the room. That part is still ours to add.

THE PROMPT WE TEACH INSTEAD

The Same Task, With the Context Added

Same topic, same 60 minutes. Everything else is what we told it.

THE PROMPT

WHAT WE ASK STAFF TO WRITE INSTEAD

“I’m a workforce coordinator developing a 60-minute, in-person interview skills workshop for adult job seekers. Most participants have limited interview experience and may be returning to work after a long absence. Create an interactive agenda that covers common interview questions, how to structure a strong response, professional body language, and a short practice activity. Keep lecture time to a minimum, use plain language, and include the time allotted for each section. The goal is for participants to leave feeling more confident and prepared for their next interview.”

WHAT CAME BACK

THE AGENDA IT PRODUCED

- Timed 60-minute agenda
- Clear learning objectives
- Activities built for adult job seekers
- Common interview questions + response strategies
- Interactive practice instead of heavy lecture
- Body language and communication tips
- A clear takeaway participants can use immediately

Still a first draft, but one worth editing.

Two more minutes of writing. That is the Personalize step, moved to the front.

Staff Started Building Their Own Tools

Both built in-house, inside our licensed workspace. Added cost: staff time.

RAISIN' FUNDS

GRANT REVIEW

A 50–100 page funding notice goes in. A decision ready summary comes out with page citations.

- Funding amount, deadline, eligible applicants
- Match and cost-sharing requirements
- Required activities, populations, outcomes
- Risks and application requirements

Staff judge fit and make the go/no-go call.

POLICYPILOT

COMPLIANCE ANSWERS

“Can ITA funds pay for this?” Plain language answer, plus the policy language and the page it came from.

- A concise answer in plain English
- The governing policy language, quoted
- Document name and page or section
- Any conflicts or open questions

When the documents don't support an answer, it says so.

Raisin’ Funds: New Grant Summary

In-house grant review and summary

Custom designed GPT that turns grant notices into documents to support the grant writing process.

- Identifies eligibility, funding amounts, deadlines, match requirements, and key restrictions.
- Summarizes required activities, and narrative questions.
- Provides page references to allow us to quickly verify information in the original notice.
- Produces an overview dashboard for meetings and project tracking

Less time reviewing grant documents and more time evaluating opportunities and developing competitive proposals.

Time savings means more grant opportunities reviewed

- In the last half of FY25-26 FRWDB
- Reviewed 50+ grant opportunities worth over $46 million
- Referred 7 grants worth $4.2 million to our partners
- Saved over 60 hours of staff time

Wilson Fish Bridge to Employment

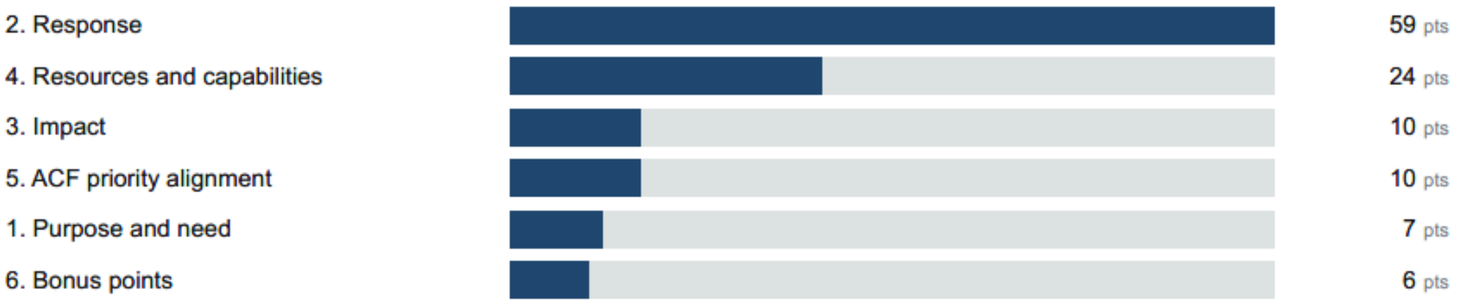
Administration for Children and Families (ACF), Office of Refugee Resettlement (ORR) | HHS-2026-ACF-ORR-RW-0008 | Cooperative agreement p. 5

$14,438,363
Award ceiling, first budget period p. 5

Aug 10, 2026
Applications due, 11:59 p.m. Eastern Time p. 45

–24
Days remaining as of Sept 3, 2026 — closed

Grant Points — 116 total p. 37



Funding — 6 awards expected p. 5

100% federal share — no cost sharing required p. 8

Indirect: approved rate, or de minimis up to 15% of modified total direct costs p. 16

Year 1 request caps by state tier: $250,000 / $500,000 / $1,200,000 / $4,500,000 / $14,438,363 p. 6

Timeline — announcement release date not specified; ceiling, floor, and tier caps apply to the first budget period only pp. 5, 6

Aug 10, 2026
Applications due, 11:59 p.m. Eastern Time p. 45

Within 30 days
ACF notifies disqualified applicants p. 36

Sept 30, 2026
Expected project start; budget period 1 of 3 begins p. 5

End date not stated
Three-year project period, three one-year budget periods, each continued only by non-competing application pp. 5, 6

Eligibility check — against stated threshold criteria pp. 6, 7, 45

A 501(c)(3) nonprofit is a listed eligible entity type: public or private nonprofit agencies may apply p. 7	Pass
Not an individual, sole proprietorship, federal entity, or foreign entity p. 7	Pass
Submitted on or before the August 10, 2026 deadline pp. 7, 45	Fail
Serves Alabama, Arkansas, Idaho, Louisiana, Tennessee, or Texas, and no other recipient is funded there — one award per state pp. 7, 54	Fail
Request is at or below the ceiling and within the state's funding tier pp. 6, 7	Review
Filed through Grants.gov with active Grants.gov and System for Award Management (SAM.gov) registrations, including a Unique Entity Identifier (UEI) pp. 3, 7	Review

Required outcomes pp. 11, 27, 49

36 months
Participant eligibility window, measured from arrival in the United States or the grant of ORR-eligible status; also the limit on services after a participant exits Refugee Cash Assistance (RCA) p. 11

None stated
No enrollment target, placement rate, or retention benchmark is set, so no baseline, timeframe, or denominator is given. Applicants must propose their own monthly or quarterly quantitative projections p. 27

4

Required attachments pp. 22, 23

- ☐ Table of contents
- ☐ Project summary, one page
- ☐ Project narrative
- ☐ Line-item budget and budget narrative
- ☐ ACF Priorities Alignment Attestation, on organization letterhead
- ☐ Legal proof of nonprofit status
- ☐ Organizational capacity information, including organization chart
- ☐ Third-party agreements for all subrecipients and contractors
- ☐ Project Abstract Summary

Organizational Fit, Budget Rules & Cost Share

Fit scorecard

Qualifies as a public or private nonprofit agency eligible to apply	Meets ✓
Delivers the required employment, placement, and employability services	Meets ✓
Manages subawards and federal award oversight under 2 CFR Part 200	Meets ✓
Serves Alabama, Arkansas, Idaho, Louisiana, Tennessee, or Texas	Does not meet ✗
Employs in-person staff in the state the project would serve	Does not meet ✗
Can cover an entire eligible state, including its remote areas	Does not meet ✗
Holds a working relationship with that state's State Refugee Coordinator (SRC)	Does not meet ✗
Verifies ORR eligibility and builds the plans required by ORR Policy Letters 16-01 and 21-06	Unclear ?
Provides or refers adult participants to English language training	Unclear ?
Holds active SAM.gov registration with a UEI and active Grants.gov registration	Unclear ?
Has an approved indirect cost rate agreement, or will elect the de minimis rate	Unclear ?

✓ Meets ~ Partially meets ✗ Does not meet ? Unclear

Cost share and leveraged funds pp. 8, 31, 39

$0 No cost-sharing requirement. The applicant does not need to contribute to project costs p. 8

Required match	None p. 8
Cash or in-kind	Does not arise. With no match required, the announcement sets no cash-versus-in-kind rule p. 8
Voluntary cost share	Accepted but excluded from merit review. If offered, ACF writes the commitment into the award and the recipient must report on it; failing to deliver the promised amount can reduce the award or trigger enforcement pp. 8, 39
Restrictions on sources	Does not arise, as no match is required. Any cost sharing offered voluntarily must be itemized in Block 18 of the SF-424 pp. 8, 31
Leveraged resources	Not specified in the announcement. No scoring criterion awards points for leveraged funds, and voluntary cost sharing is expressly excluded from review p. 39

Budget rules — allowable and unallowable uses of award funds

✓ Allowable uses

- Employment services: world-of-work and job orientation, job clubs, job workshops, job development, referral, job search, and job placement with follow-up p. 12
- Employability services: assessment with aptitude and skills testing, on-the-job training, vocational training including driver education, and skills recertification p. 12
- Support services when needed for participation or job retention: child care, transportation, translation and interpreter services p. 12
- Case management, and assistance obtaining Employment Authorization Documents (EADs) p. 12

✗ Unallowable uses

- Construction, purchase of real property, or major renovation p. 16
- Pre-award costs p. 16
- Direct assistance payments to participants: cash assistance, mortgage, rent, other housing costs, and medical exam fees p. 16
- U.S. Citizenship and Immigration Services (USCIS) application fees, except costs of application assistance related to EADs p. 16
- DEI and DEIA activities, related research, and efforts promoting a “discriminatory equity ideology” p. 15

PolicyPilot: Faster, More Reliable Policy Guidance

Helps employees find and understand guidance from approved workforce policies and directives.

- Custom built RAG backend with both State and Local workforce directives and policies
- Translates complex policy language into clear, actionable, and practical guidance.
- Provides direct quotations and source citations so staff can verify each response.
- Helps staff compare requirements across policies and identify possible conflicts or gaps.

Faster policy research, more consistent guidance, and decisions grounded in documented requirements.

Speeds up review of state rules

- Helped guide changes to our local ETPL rules to comply with the most recent state ETPL changes”
- Sped up staff training time on new policies
- Checks communications with providers to ensure that our staff guidance is in line with workforce directives

PolicyPilot in Action: RAP Verification

Question: What proof must a provider submit to show that it is an approved Registered Apprenticeship Program?

No specific proof document is required

WSD 25-02 treats **registration status and not possession of a particular certificate or approval letter as the determining factor.**

What qualifies	Who verifies	What the sponsor provides
Registration with the U.S.	EDD verifies RAP registration and	Occupations, sponsor and training-

Practical takeaway: Confirm the program's current status on the California ETPL. The directive does not require the Local Board to collect a separate approval certificate.

Source: California ETPL Directive WSD 25-02, pp. 17 and 22.

DID IT WORK?

Seven Months Later

From our June 2026 AI readiness survey — 67 employees surveyed

91%

are comfortable using AI in their role

69%

use AI every day or weekly

AND THREE THINGS THAT NOW EXIST

- A board-wide Generative AI Usage Policy in effect since March 2026
- A vetted, shared AI Tools Reference Guide every employee can open
- A full hands-on AI in Case Management training built and delivered

WHAT WE LEARNED

Seven Things That Mattered Most

In the order they mattered. None of them needed a budget approval to begin.

1 **Govern, don't ban**

Staff were going to use it either way. So we wrote rules.

2 **Vet a shared toolkit**

One approved list beat ten personal ones.

3 **Draw hard lines**

No PII. No AI-written case notes. No eligibility calls.

4 **Teach the workflow**

Generate → Edit → Personalize, with human review every time.

5 **Keep humans accountable**

Staff own the final product. Always.

6 **Ask your own staff**

They named our use cases and our risks for free.

7 **Bring IT and security in early**

Before you scale, not after something goes wrong.

WHERE WE GO FROM HERE

What's Next for Us

The policy has a review date for a reason. None of this is finished.

1 Expand the approved-tools list

As we vet more tools, the reference guide grows. Staff can request a review of anything new.

2 More role-specific training

Case management was first. Business services, administration, and communications are next.

3 Apply the same order to new work

People first, then policy, then practice, on every initiative, not just this one.

4 Review the policy on a schedule

Tools, laws, and staff needs all move. The bulletin gets revisited at least annually.

The technology will keep moving faster than any policy cycle. The habits are what carry over.

THE WHOLE ARGUMENT IN THREE LINES

If You Remember Three Things

01 Lead with workforce outcomes, not AI novelty.

02 Train the people who guide job seekers before you train job seekers.

03 Write the policy before you scale the pilot.

From Curiosity to Capacity:

Seven months from staff experimenting independently to a governed, everyday capability built through staff time.
