VENTURA COUNTY

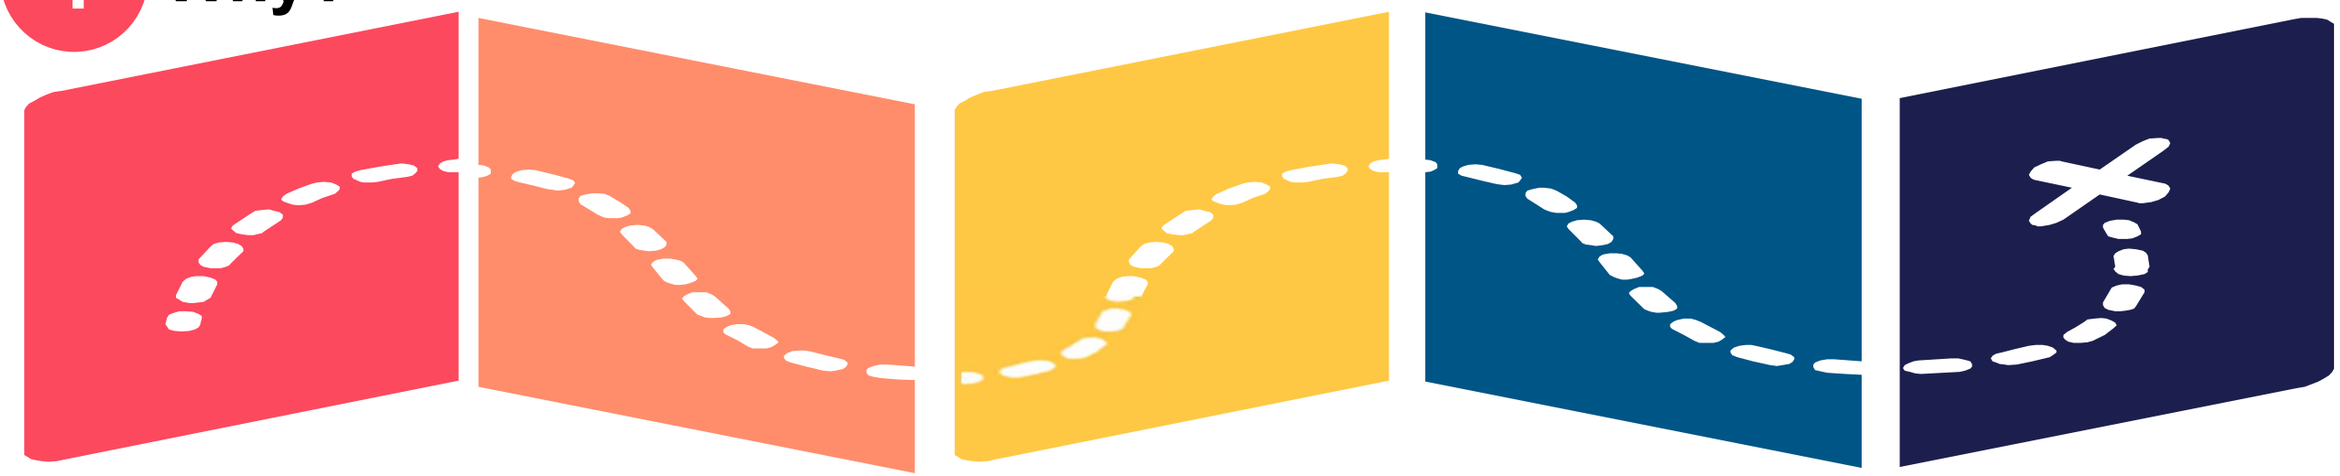

Using GIS Mapping to Improve Data-Informed Workforce Planning, Outreach, & Service Delivery

WORKFORCE DEVELOPMENT BOARD of Ventura County

SESSION GOALS

1. Why?
2. Share the GIS Tool
3. Workshop applications for GIS mapping to improve workforce services
4. Understand the limits of the visualized data
5. Process for creating your own

WHY?

- Workforce boards collect a tremendous amount of data.
- This tool puts that data to work.
- Data becomes more actionable when connected to place.

Helps Fulfill Our Strategic Priorities

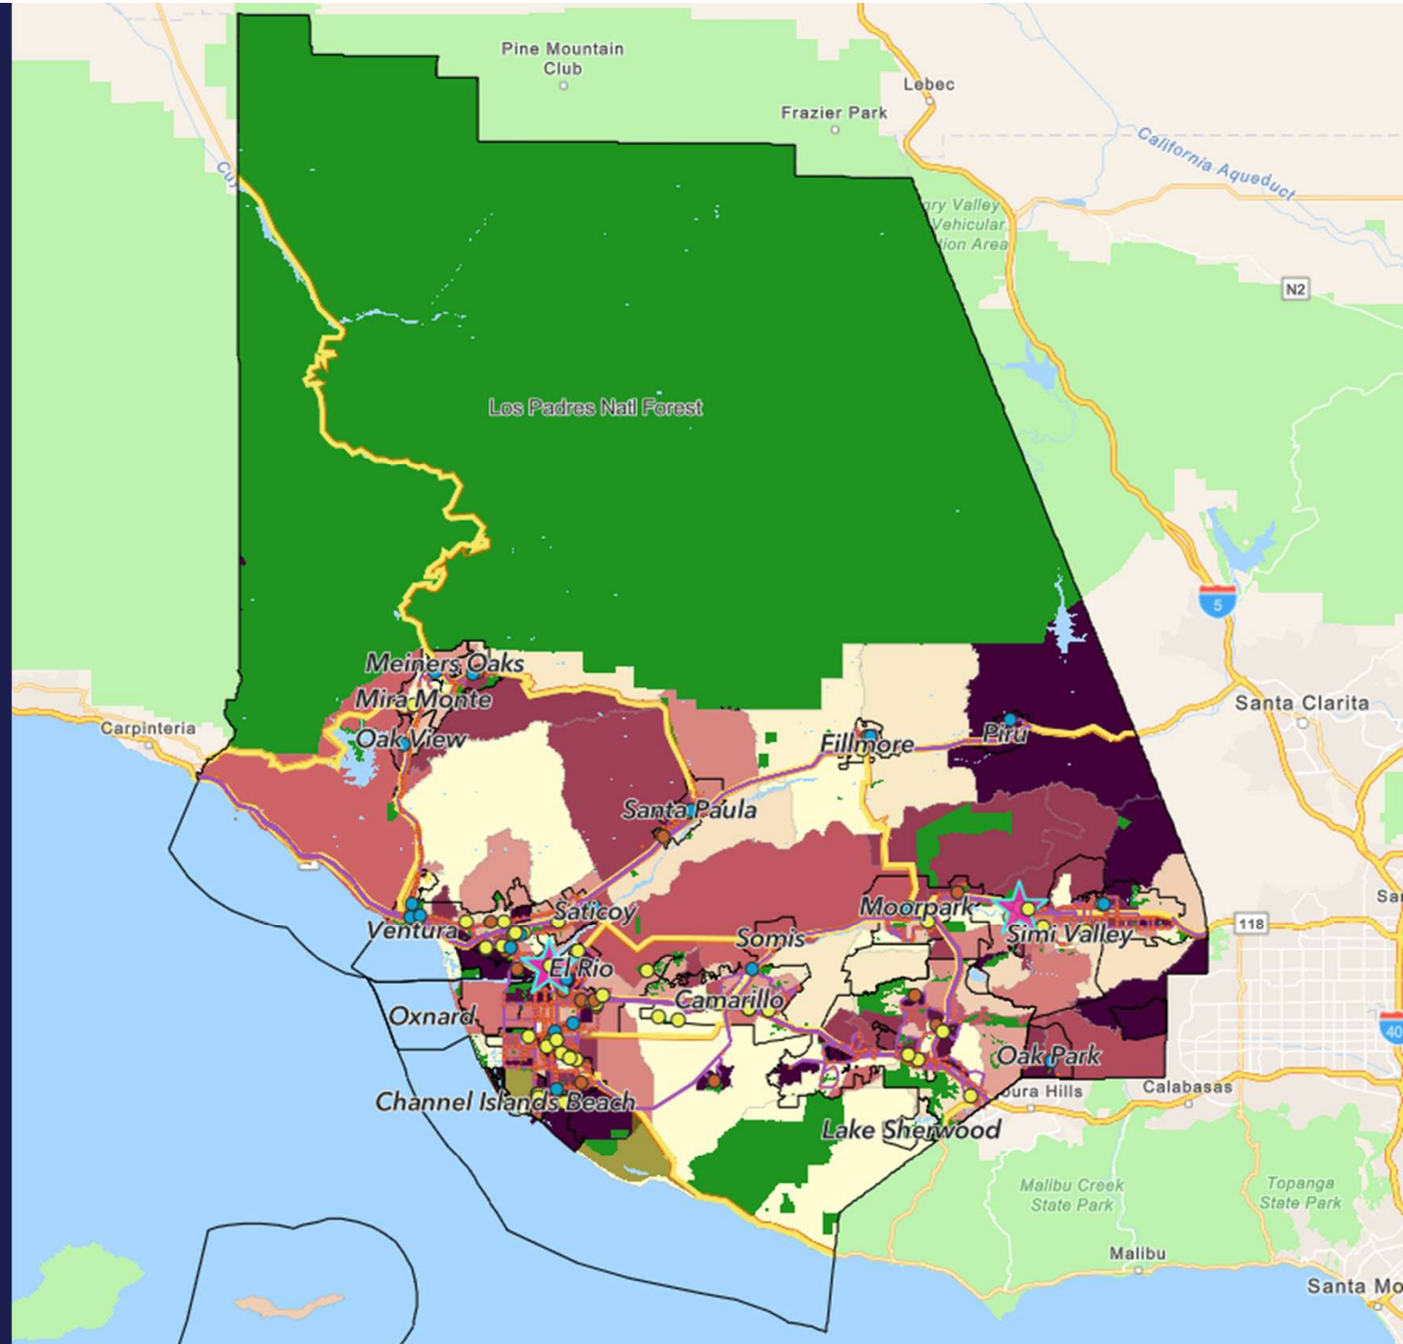

GOAL 3: Strengthen regional collaboration & public awareness to increase access to Ventura County's workforce system

Increase awareness of and participation in Ventura County's workforce system among job seekers and employers through coordinated, bilingual outreach and equitable access to no-cost training and employment services.

1. **Strengthen Regional Collaboration**
2. **Increase Public Awareness of Workforce Services**
3. **Conduct GIS mapping to understand current service provision and service gaps**
4. **Strengthen Employer Engagement**
5. **Improve Working Group Structure and Effectiveness**

One View Connects:

- Business Services

Purpose of Mapping Tool

WORKFORCE DEVELOPMENT BOARD of Ventura County

- ✓ Identify where workforce services are being delivered
- ✓ Analyze potential service gaps relative to community need
- ✓ Understand geographic concentrations of workforce demand
- ✓ Inform outreach strategies and partnership development
- ✓ Support data-informed planning and funding decisions

Access the Tool:
https://experience.arcgis.com/experience/8ecd7a4c881546fbb152fb0bf3884a2a

About the Data Used

WORKFORCE DEVELOPMENT BOARD of Ventura County

DEMOGRAPHIC DATA (presented by Census Tract):

- U.S. Census Data, ACS 5-year data by census tract (2020–2024)
- ESRI, 1-year estimates

PARTICIPANT DATA (presented by Census Tract):
CalJOBS adult and youth participation: FY 2023–24 and FY 2024–25

WORKFORCE ECOSYSTEM
Workforce, education, library, supportive-service and transit locations

BUSINESS SERVICES
FY 2024–25 activity by service category and sector

GIS Mapping Ventura County Workforce Resources and Services*

Workforce Development Board of Ventura County (WDBVC)

WDBVC created this interactive map to better understand who the workforce system is serving, where services are located, and where gaps may still exist across the County. This tool brings together information about job seeker and business services, workforce services, and demographic data.

Workforce Boards collect a lot of data and this map is one way WDBVC shares that information to increase transparency, strengthen partnerships, and better support individuals and businesses throughout Ventura County.

We hope this tool helps our partners see the bigger picture, identify unmet needs, and make informed decisions about outreach, planning, and collaboration.

The maps in this tool can help the WDBVC and its partners:

- Identify where people are being provided workforce services
- Analyze potential service gaps relative to community need
- Understand geographic concentrations of workforce demand
- Inform outreach strategies and partnership development
- Support data-informed funding and planning decisions

How to Use the Maps:

- Each tab provides additional data layers and interactive features to help you analyze workforce conditions across the County.
- For the best experience, view in full-screen mode.
- The maps include a layer called "Parks and Features." This layer is included to show where rural and unpopulated areas are located, in order to prevent unintentionally assuming they are high-need areas despite having a low population density.

Use the Table feature to view and download underlying data.

Use Print to export a customized map. You can select the format you want as well as the details to include. Once you click "print", go to the "print results" tab to access your file.

Sources include: American Community Survey (US Census), Employment Development Department, CalJOBS, Workforce Innovation and Opportunity Act

Last Updated: 03/6/26. For questions about this tool, please contact: jessica@causeimpacts.com

***Created in collaboration with Cause IMPACTS and Datalink Partners**

How to Use the App

The Mapping App is an interactive tool and is laid out much like a website, with a navigation menu with 4 tabs (at the top) that outline the content available

1. **DEMOGRAPHICS** — Regional Context. Who may face barriers?
2. **WORKFORCE NEEDS** — Where does participation align with need? Where are services provided?
3. **BUSINESS SERVICES** — Where are employers being reached?

Understanding the Map Layout

WORKFORCE DEVELOPMENT BOARD of Ventura County

- The top left (dark blue background) of each page/tab includes info. about the map.
- The bottom left presents the layers, which can be turned on/off. Each tab provides additional data layers and interactive features to help you analyze workforce conditions across the County.

 ***Layer is turned on***

 ***Layer is turned off***

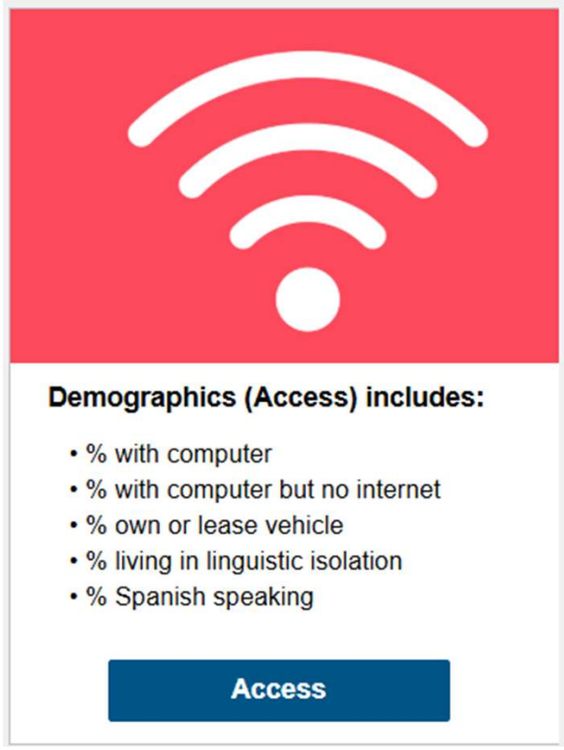

- The  **button** can be used to return the map to the default view
- The right side of the map includes the legend.
- Maps include a layer called "Parks and Features." This layer is included to show where rural and unpopulated areas are located, to prevent unintentionally assuming they are high-need areas despite having a low population density.

Demographics (Tab)

The **Demographics** tab includes three sub-tabs that can help answer the question, w*hat are the demographics of Ventura County residents who experience barriers to employment?*

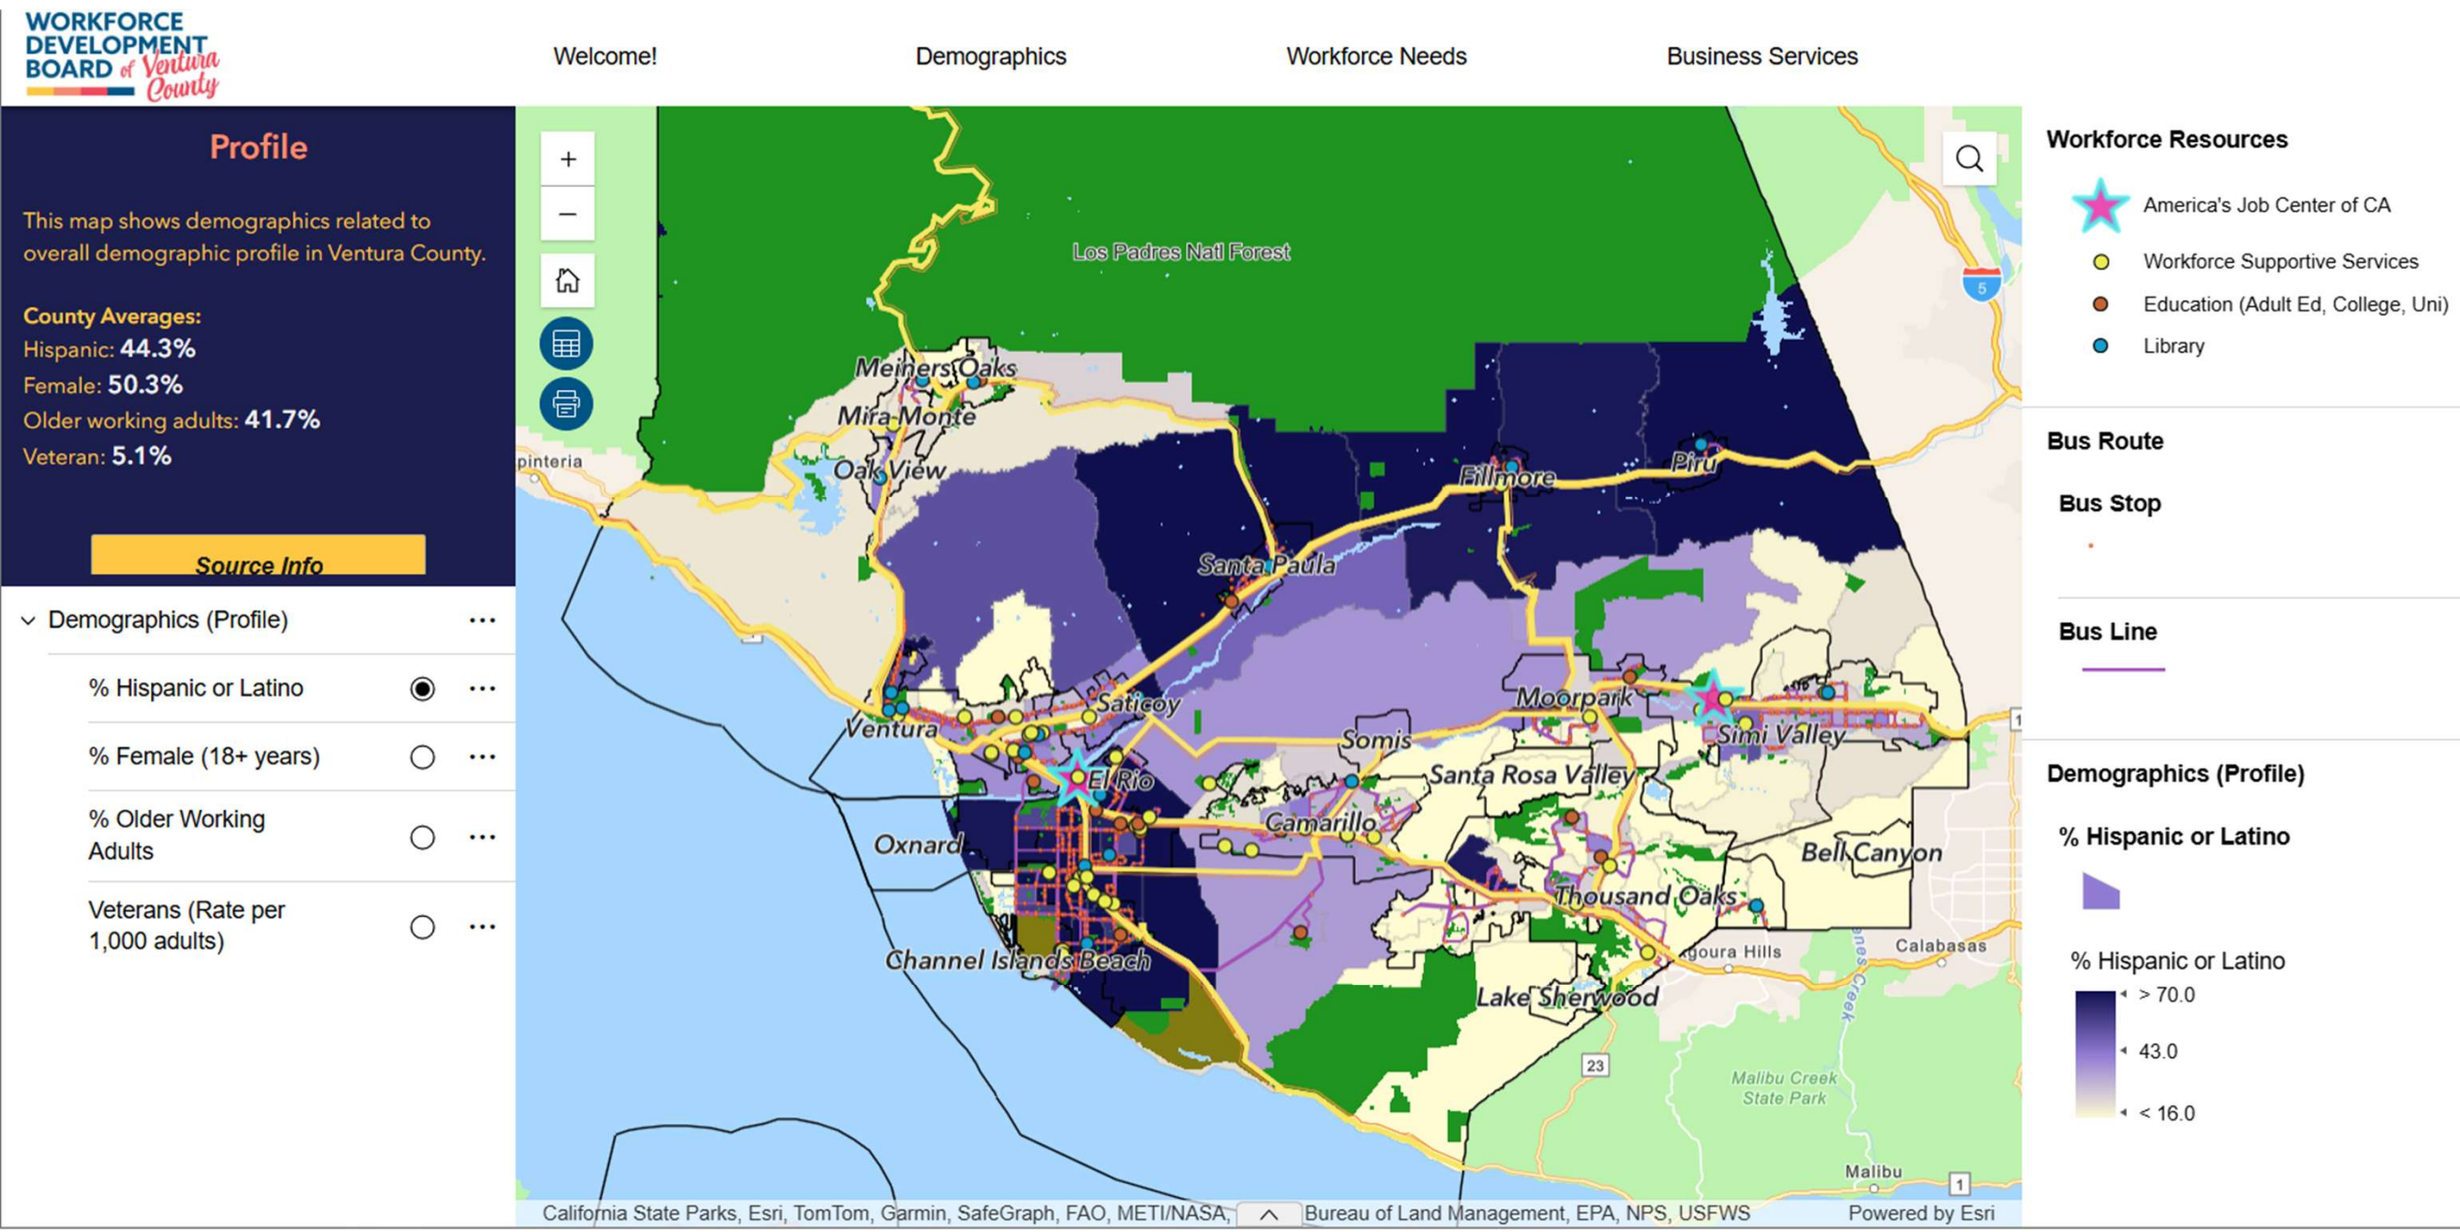

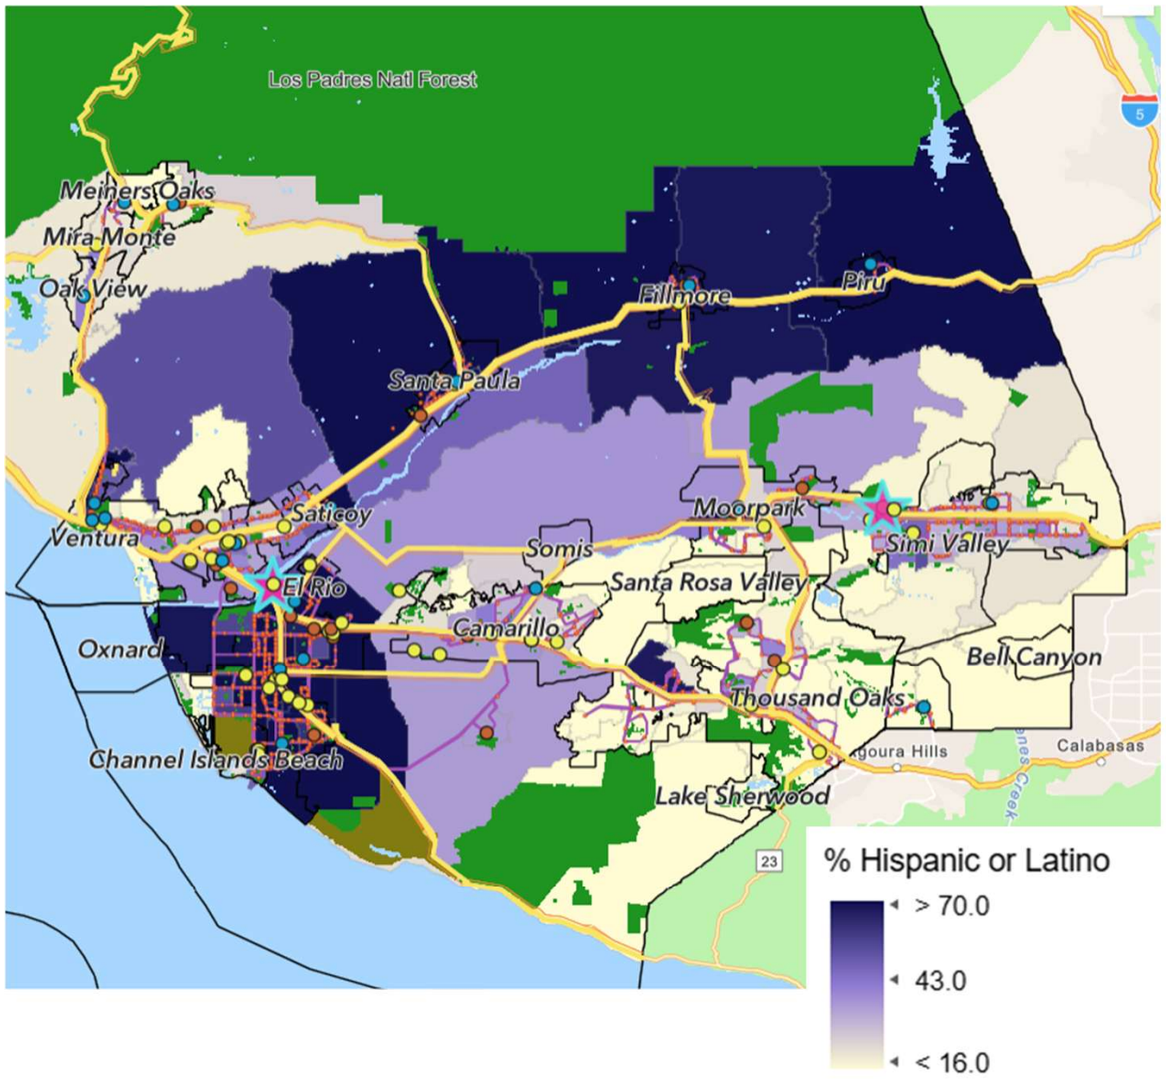

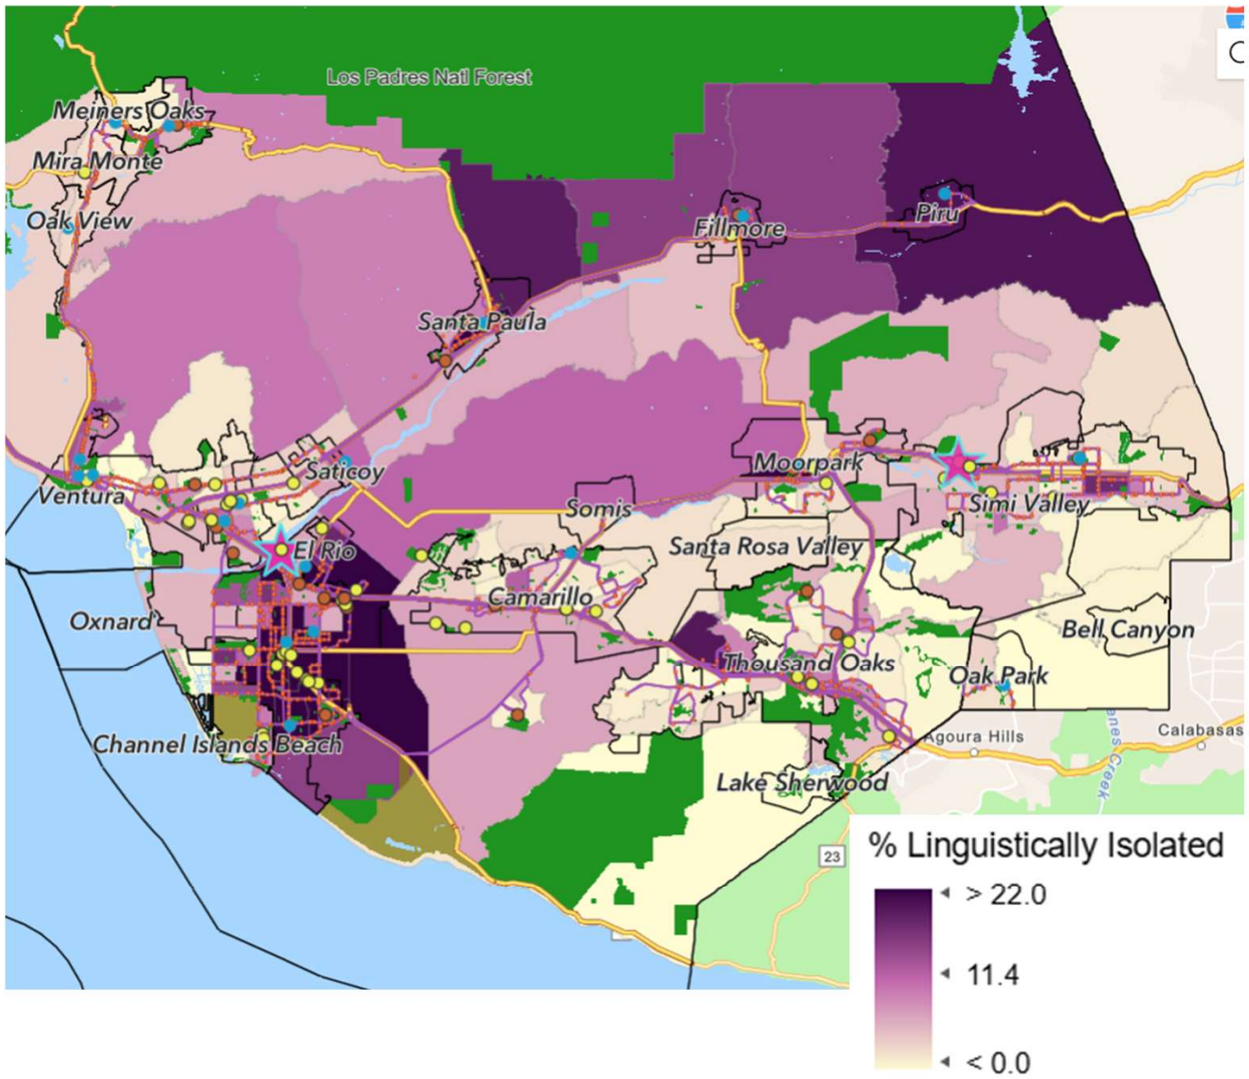

"Source info" button takes you to the variable information and its data source.

RESEARCH: Where are there concentrated Latino/a communities?

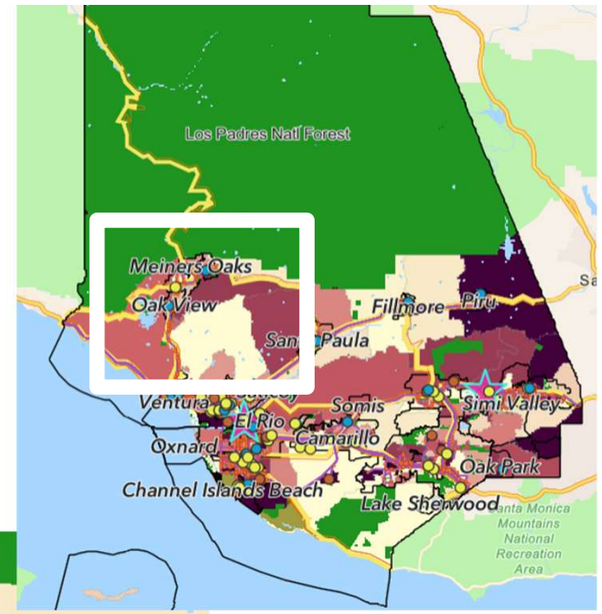

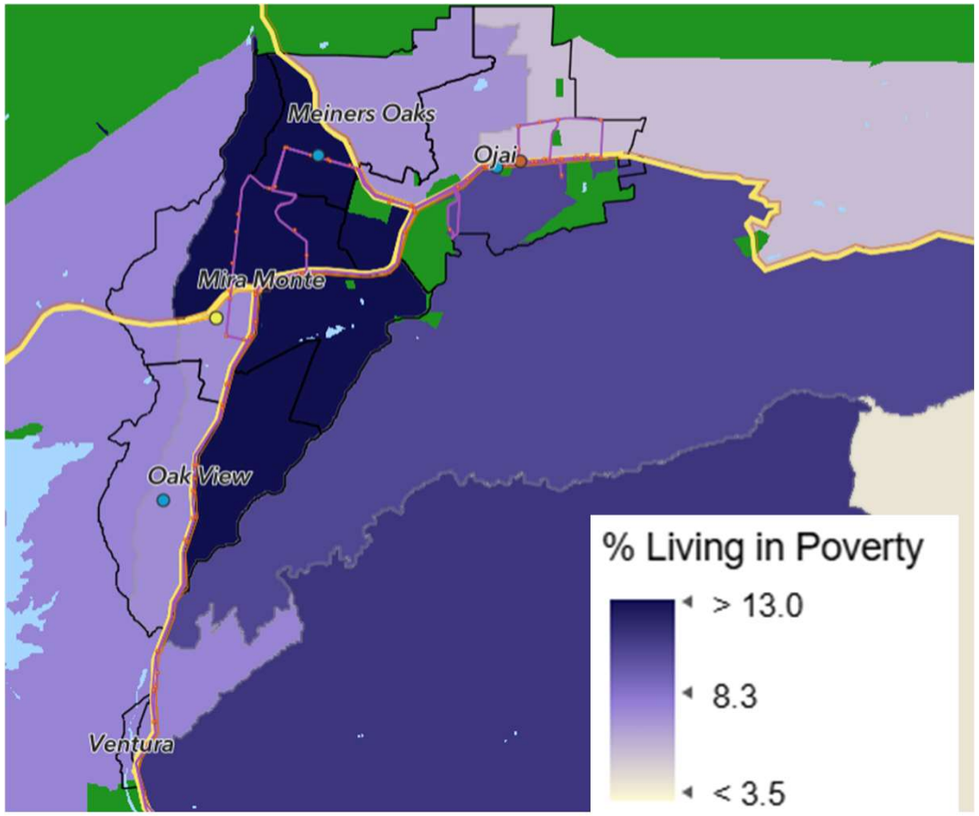

RESEARCH: WHERE SHOULD WE FOCUS BILINGUAL OUTREACH?

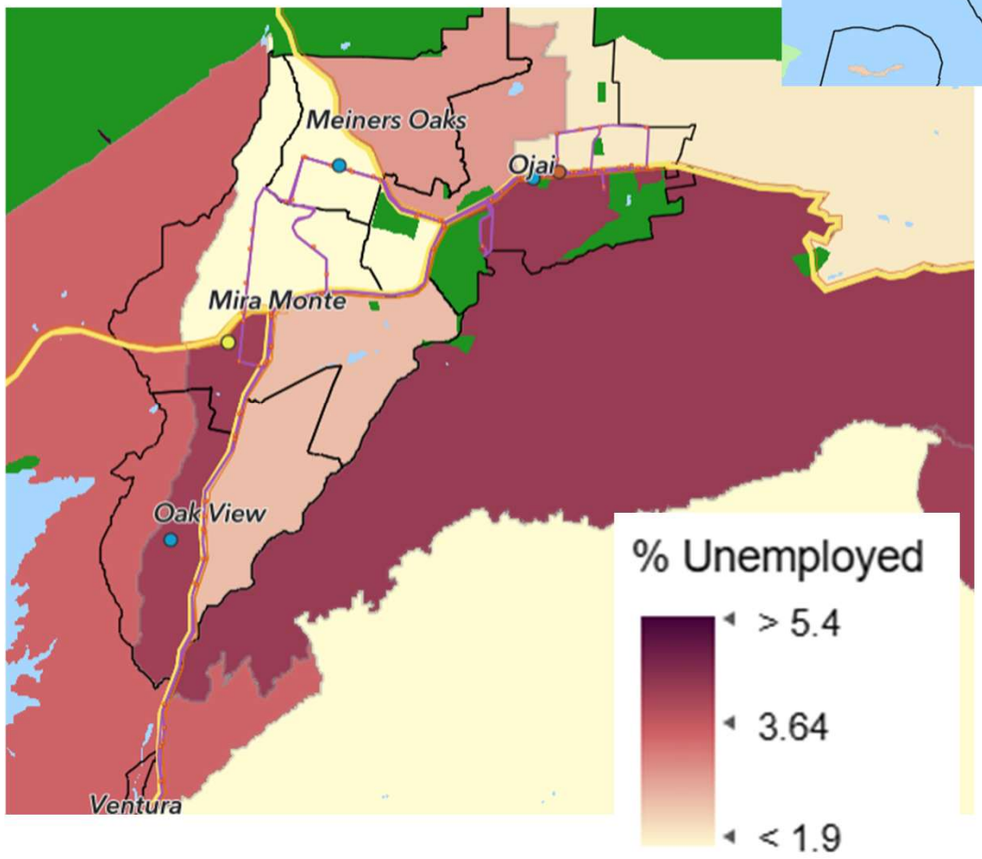

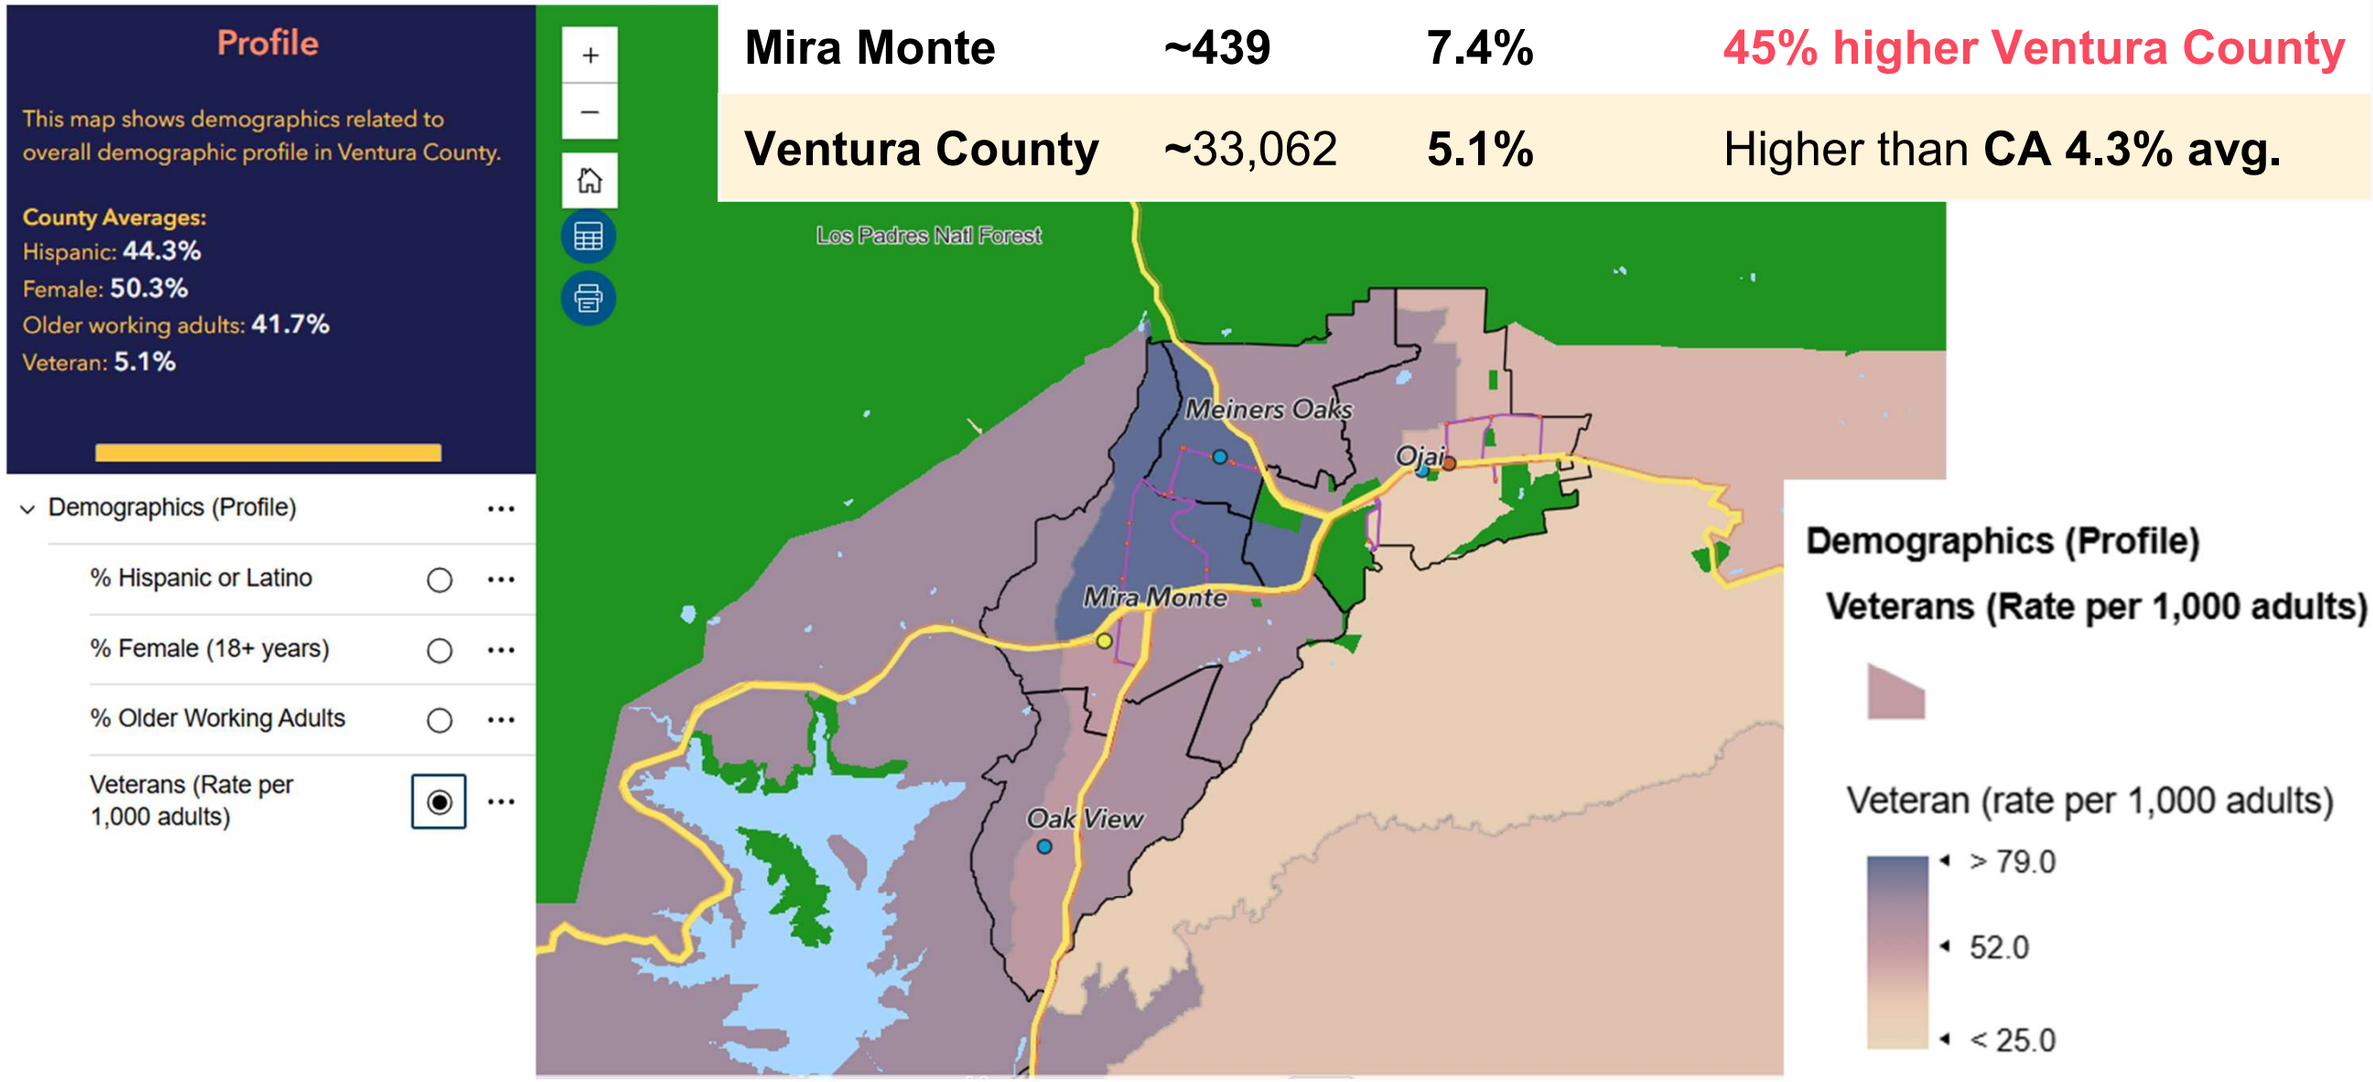

RESEARCH:
What are the needs in Meiners Oaks and Mira Monte?

Area	Veterans	% of Pop.	Comparison
Meiners Oaks	**~294**	**9.1%**	**~2× Ventura County**
Mira Monte	**~439**	**7.4%**	**45% higher Ventura County**
Ventura County	~33,062	**5.1%**	Higher than **CA 4.3% avg.**

MAPS GUIDE.

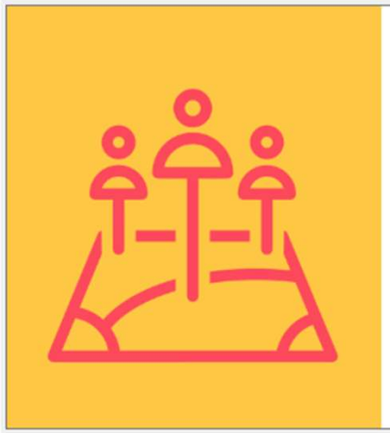

PEOPLE DECIDE.

Workforce Needs (Tab)

WORKFORCE DEVELOPMENT BOARD of Ventura County

The **Workforce Needs** tab includes four sub-tabs that can help answer the questions: w*here in Ventura County does the WDBVC currently serve jobseekers* and w*here are there current access gaps in workforce services?*

Adult Service Gaps

Includes:

- FY 2023-24: WDBVC participation rates for Adults (18+)
- FY 2024-25: WDBVC participation rates for Adults (18+)
- High Need Areas
- Workforce resources

Adult Service Gaps

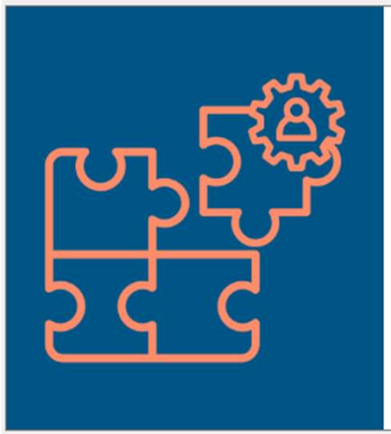

Youth Service Gaps

Includes:

- FY 2023-24: WDBVC participation rates for Youth (14-24)
- FY 2024-25: WDBVC participation rates for Youth (14-24)
- High Need Areas
- Workforce resources

Youth Service Gaps

Service Gaps

Includes:

- High Need Areas
- Workforce resources
- Population density

Service Gaps

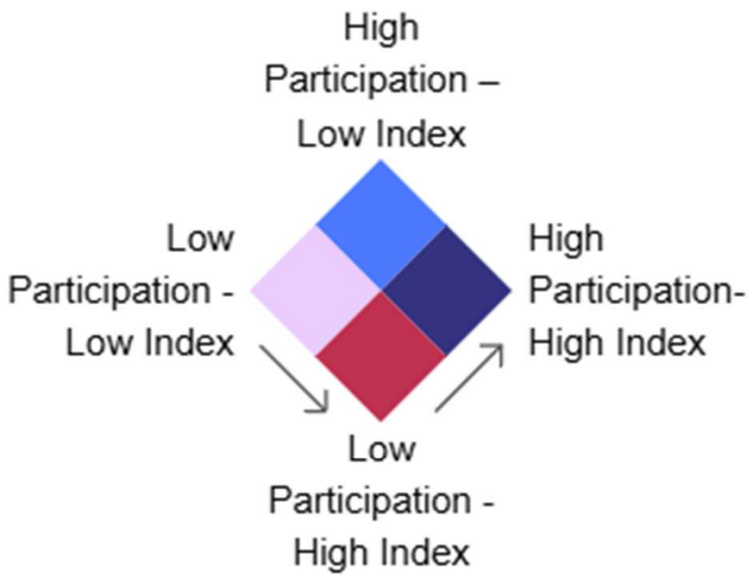

High Need Areas

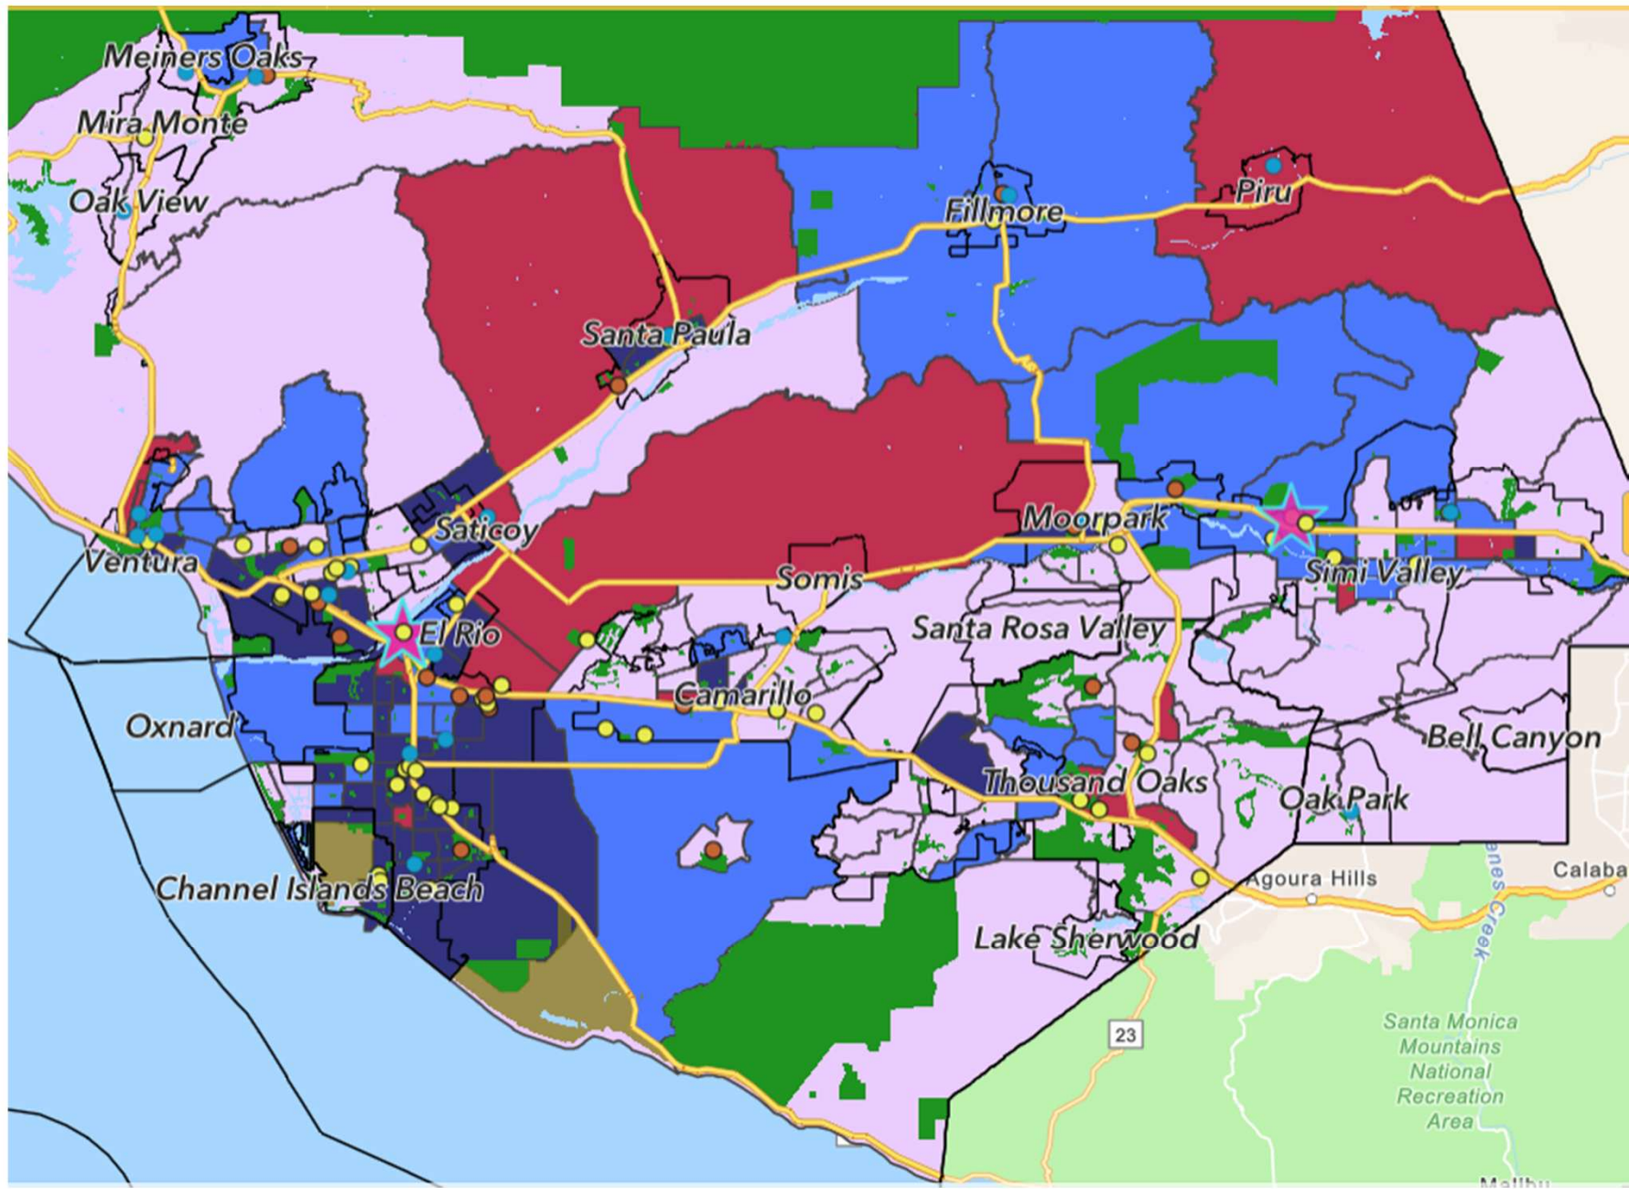

Includes:

- Adult participants per 1,000 residents
- Youth participants per 1,000 residents
- High Need Areas
- Workforce resources with one-mile buffer

High Need Areas

Adult Job seeker Service Gaps - Need vs. Participation

High Need Areas:

- **% unemployed;**
- **% poverty;**
- **% Linguistically Isolated**
- **% with No HS diploma**

Adult Service Gaps

This map shows the WDBVC participation rates for adults in relationship with the High Needs Area index (1=low need; 5= high need).

Red shading indicates high Index score but low participation rates-- areas WDBVC could target in the future for services.

Note that when the yellow button is fully on the right side of screen, FY 24-25 data are presented whereas when it is swiped to the left, FY 23-24 data are presented.

Swipe to compare FY24-25 to FY23-24

DECISION LAB

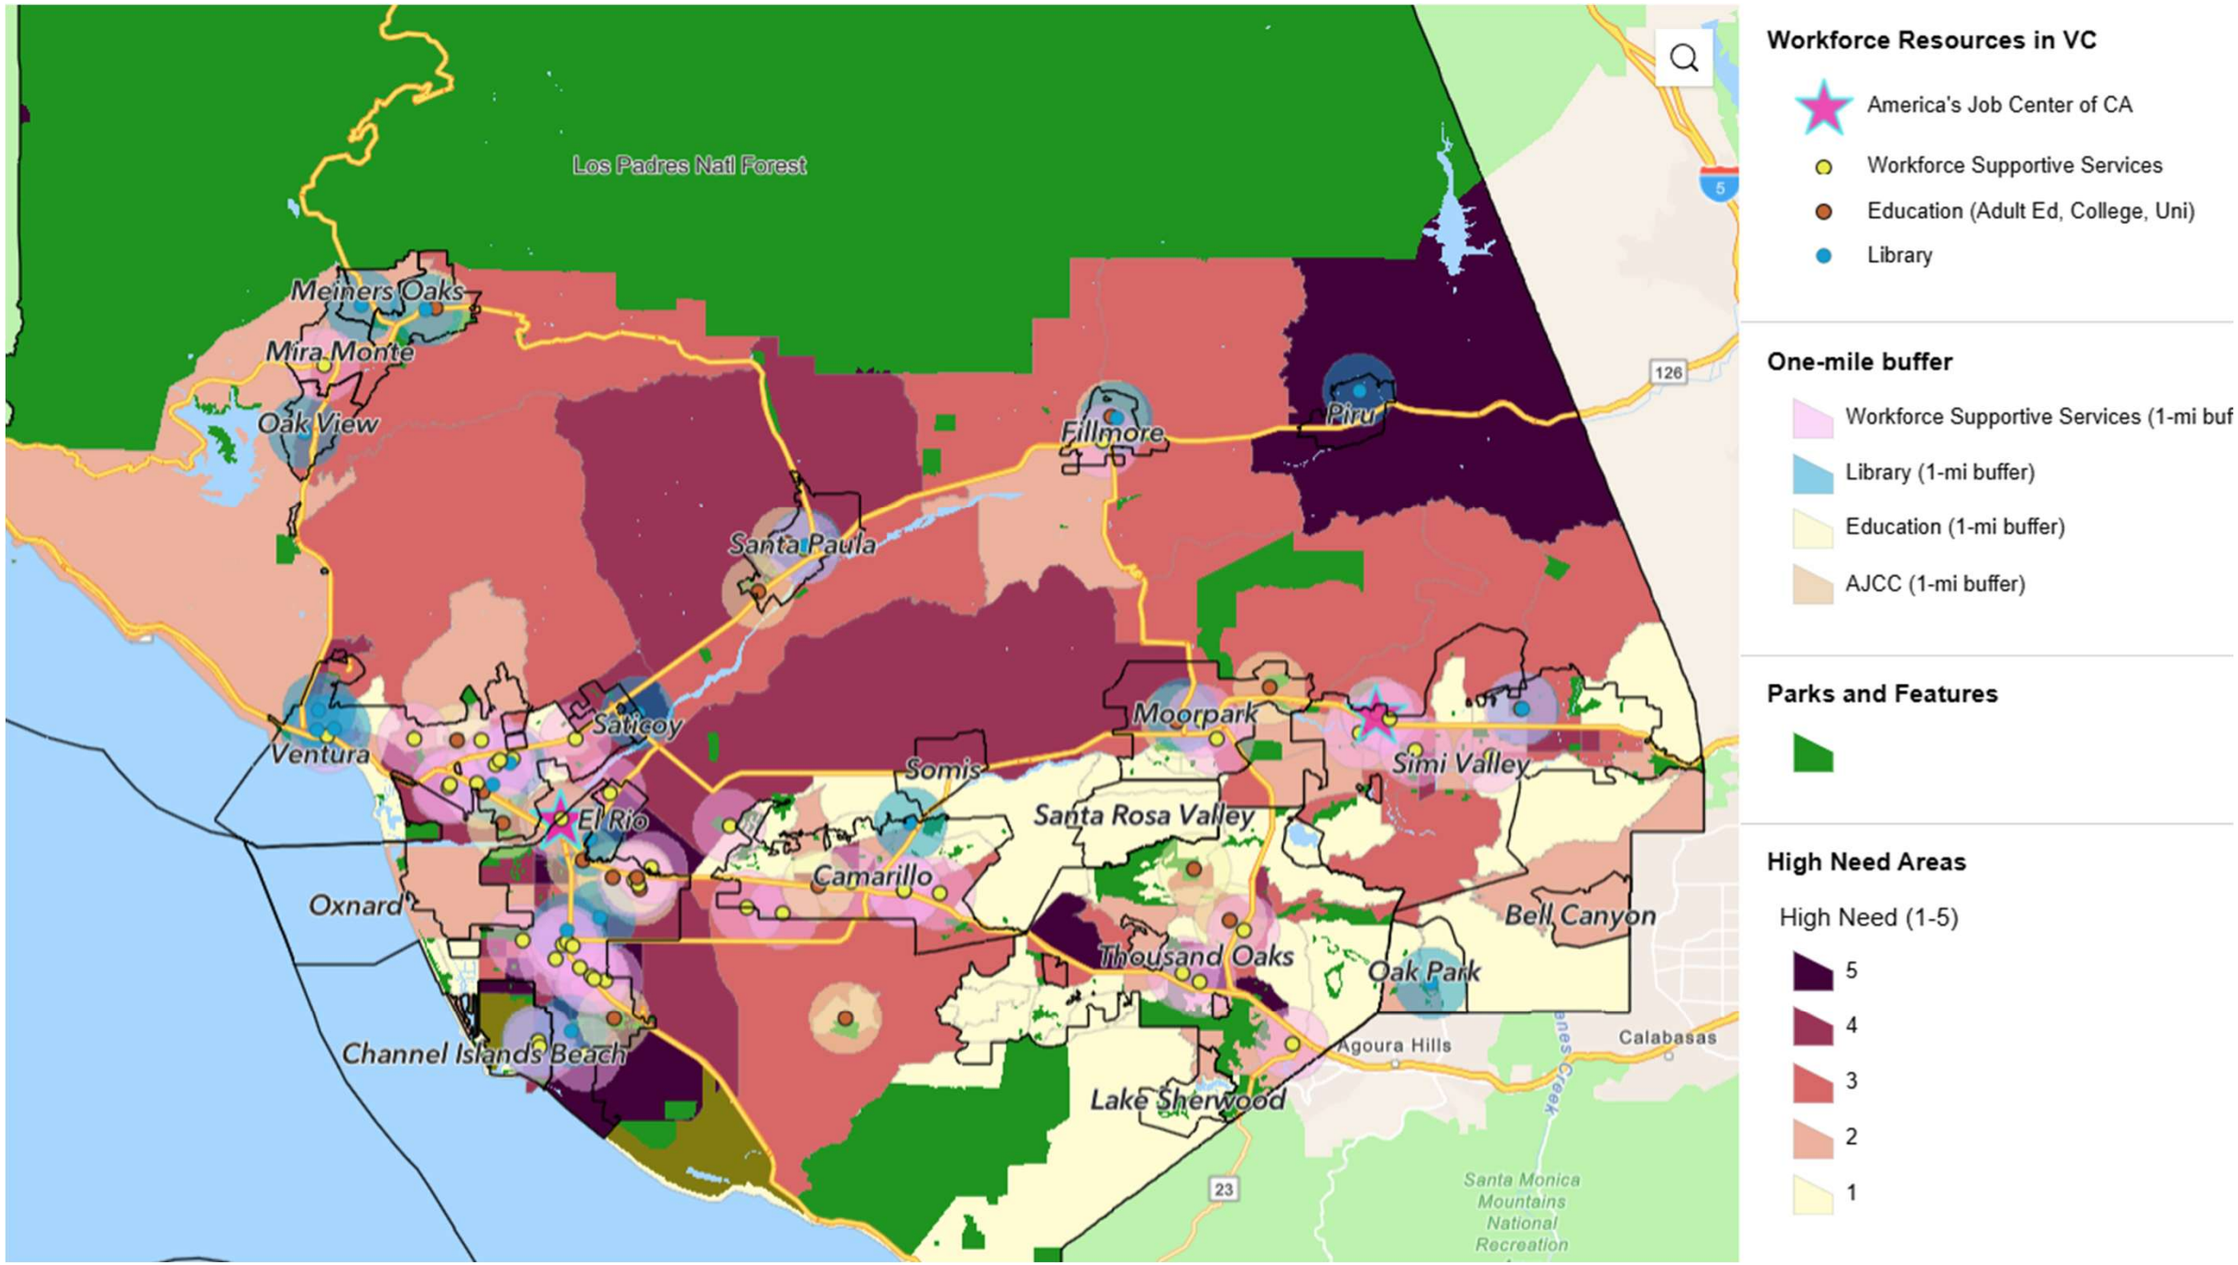

WORKFORCE DEVELOPMENT BOARD of Ventura County

Your board wants to increase service provision to jobseekers most in need. We want to provide them with some ideas we can possibly implement.

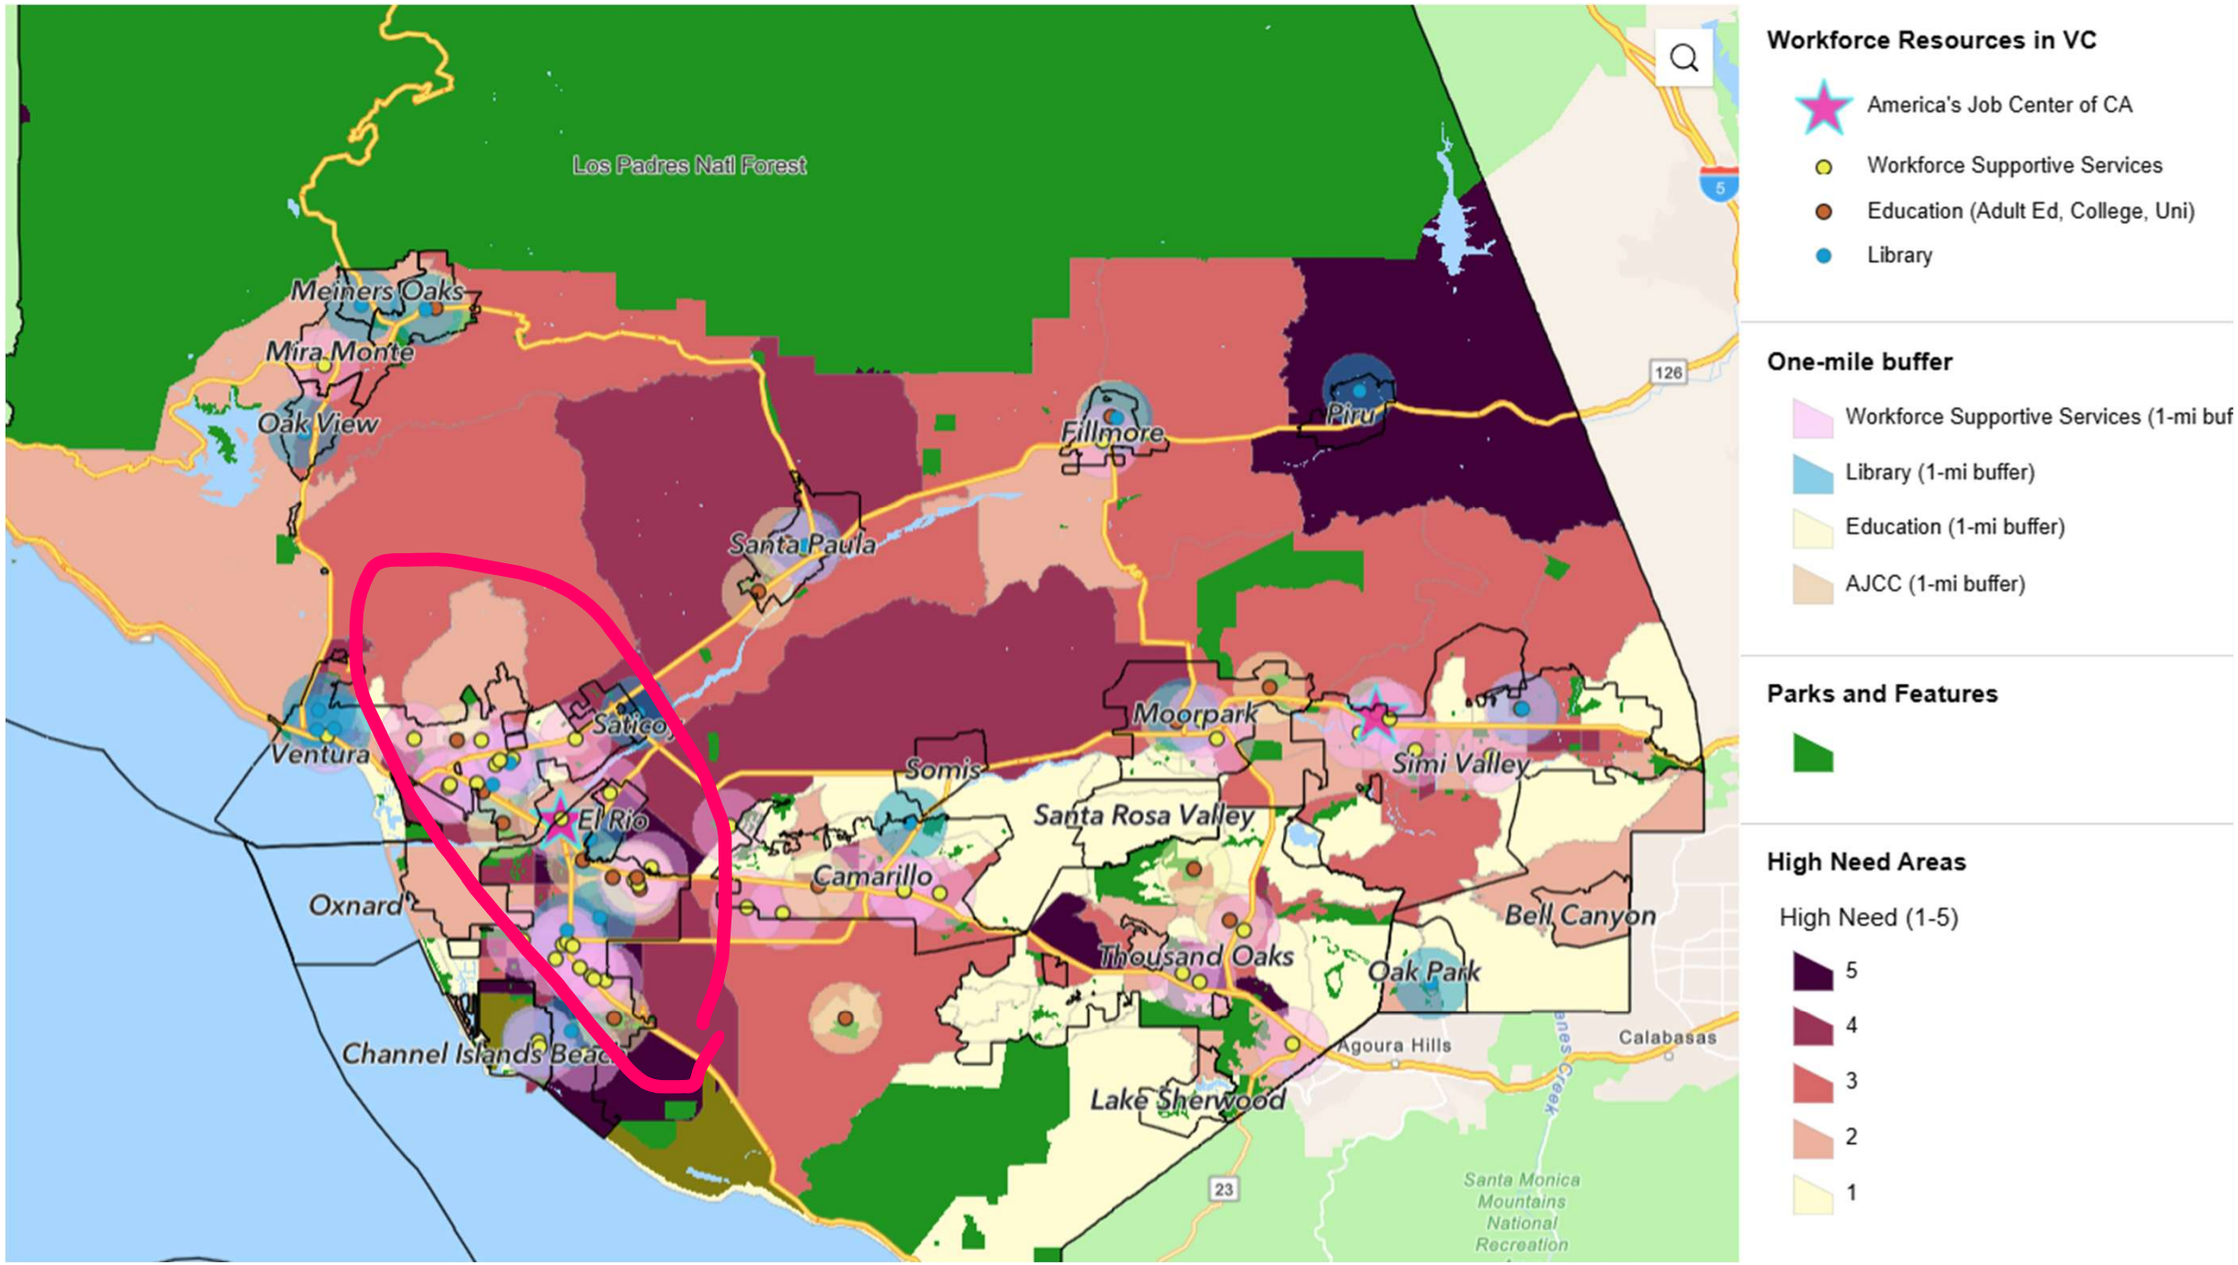

1. Name the pattern/s you see.
2. Identify what you still need to verify or triangulate.
3. Choose an action plan and gather partners.
4. Define success measures.

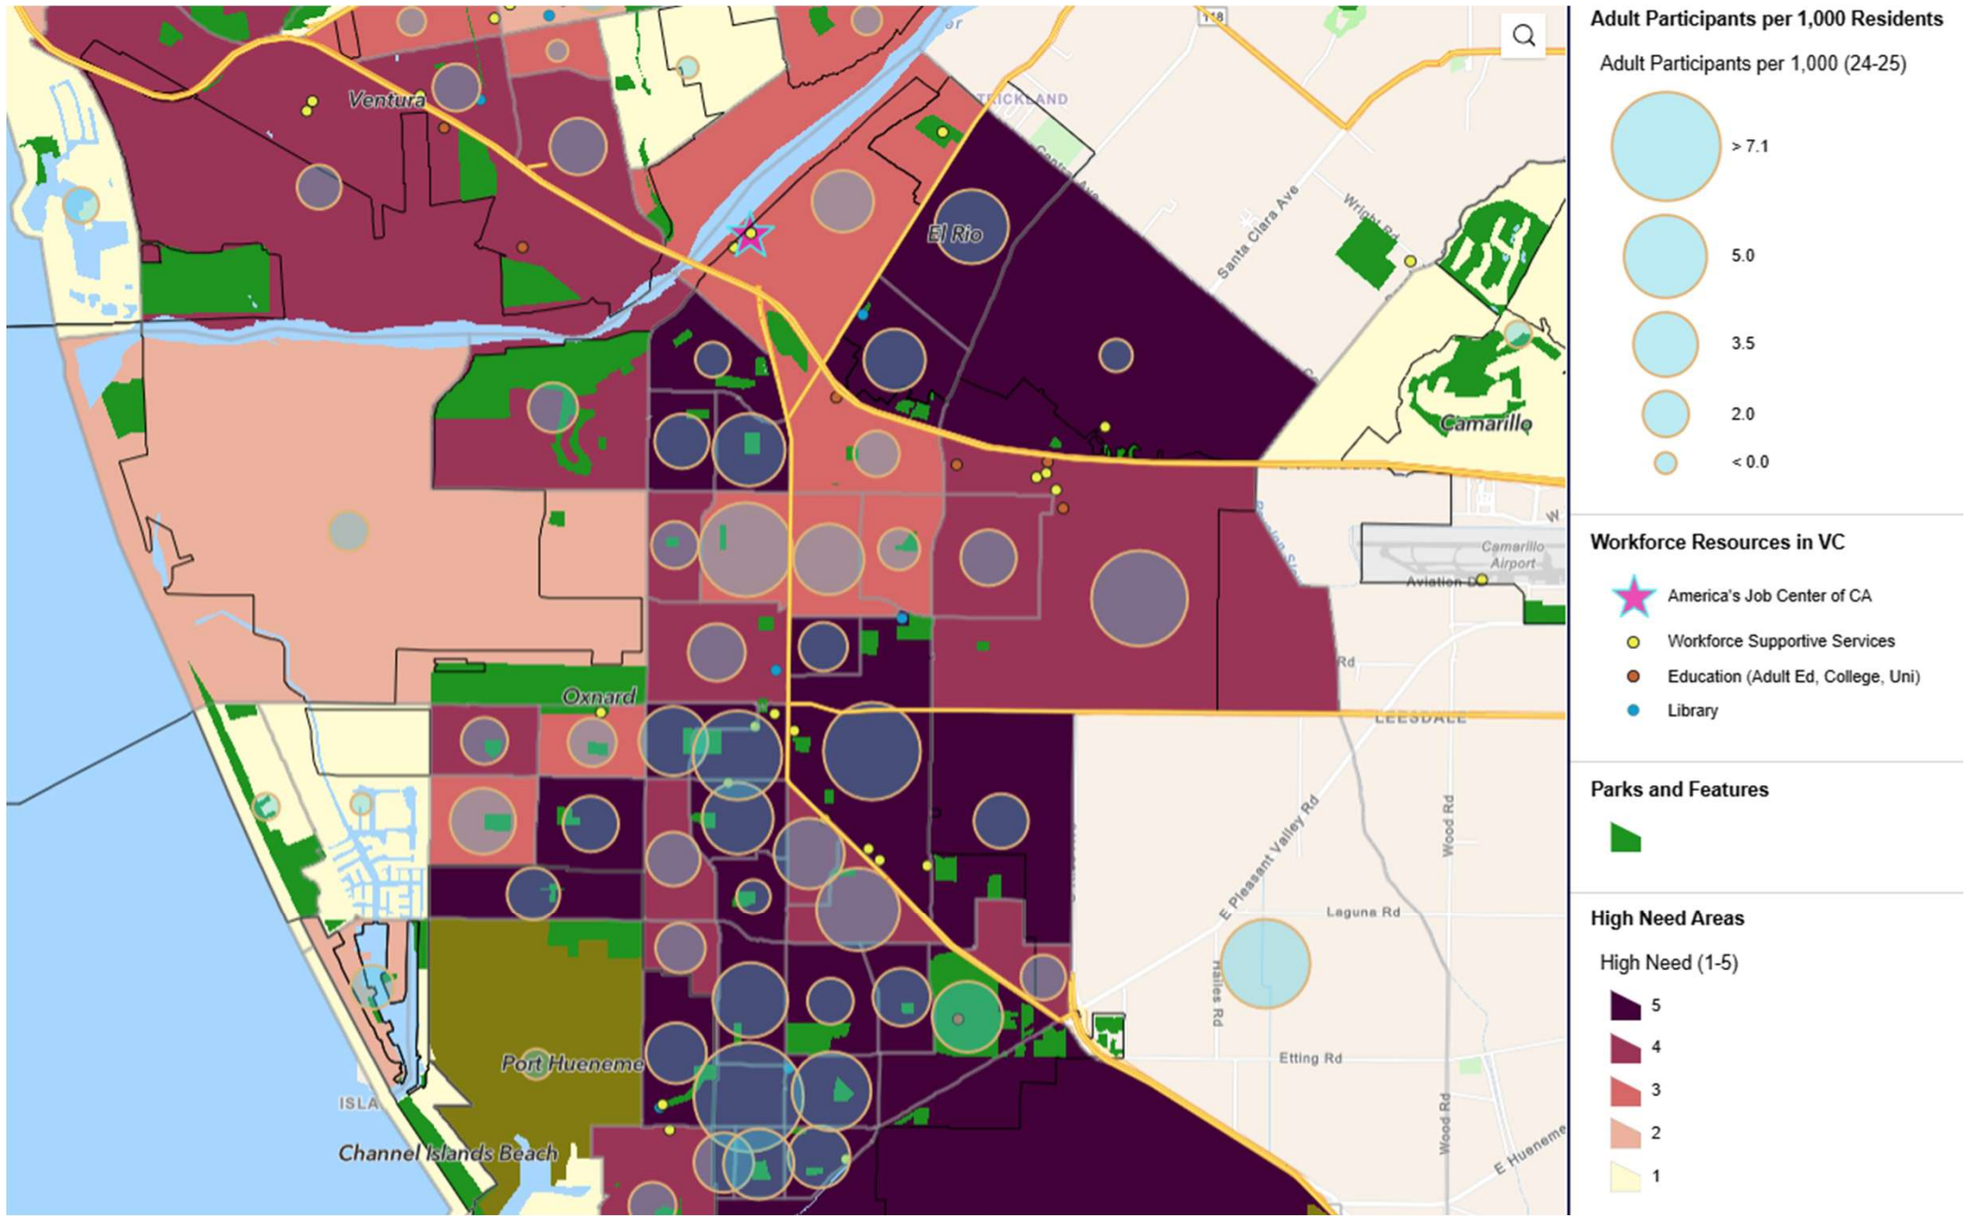

What patterns do you see? Workforce services concentration?

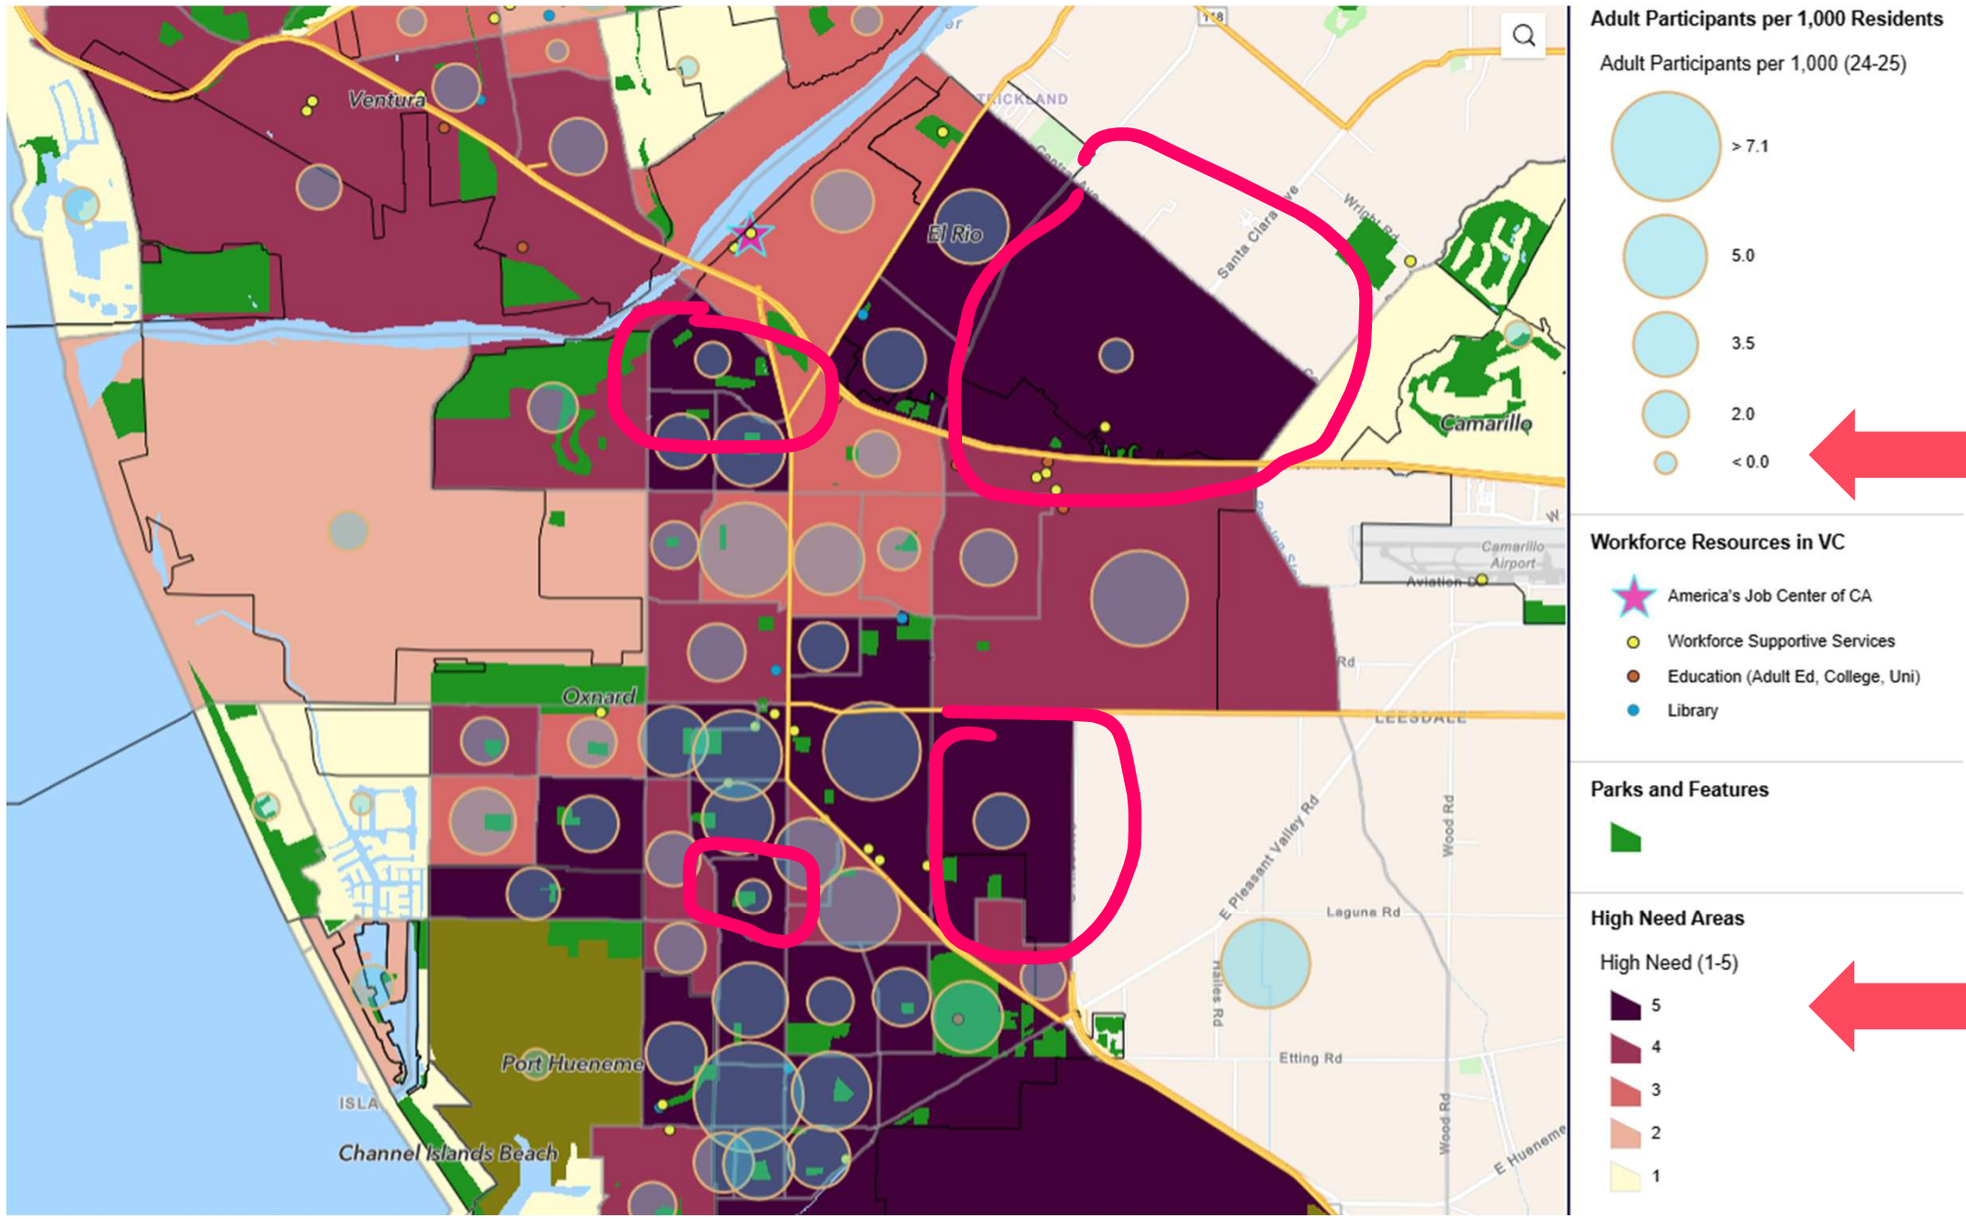

What patterns do you see? Workforce services concentration?

Focus on areas that have high needs and low participation

Focus on areas that have high needs and low participation

BUILD FOR USE

WORKFORCE DEVELOPMENT BOARD of Ventura County

1. **Start with recurring decisions / Begin with questions—not layers.**
2. **Inventory, define, and clean the data.**
3. **Decide how to categorize and present data.**
   (E.g., Use rates and denominators, not counts alone)
4. **Build and test the tool**
   (E.g., Protect rural areas from being hidden by density)
5. **Pair maps with local knowledge** (Triangulate data)
6. **Maintain and refresh**

GIS Maps can be Used to:

WORKFORCE DEVELOPMENT BOARD of Ventura County

- Develop localized efforts across the region based on demographics, participant data, and resource locations
- Inform service delivery, operations, and outreach
- Make decisions about where to expand or contract services
- Inform contractor scopes, expectations, goal-setting, and planning
- Provide data for grant applications
- Target Marketing efforts or localized social media ads
